

# Cooling

The Vario cooling 400 series

**GAGGENAU**

## Cooling, that makes a statement.

The Vario cooling 400 series can be finished in the same material as the rest of your kitchen furniture or as a single sheet of stainless steel; with or without a handle. Wine cabinets are offered with glass doors framed in either the kitchen's furniture material or in stainless steel as a special accessory. Assisted opening effortlessly reveals an uncluttered stainless steel interior with dark anthracite aluminium elements and clear glass shelving illuminated by warm white, glare-free LEDs.

Personal preferences can be programmed into the intuitive TFT touch display. The placement of the shelving and solid anthracite aluminium door racks can also be personalised, being easily adjusted using the flexible, near-invisible, rail system. This allows side by side installations to mirror shelving arrangements and present aligned shelves and door racks to the viewer.

Refrigerators house one fresh cooling drawer whose temperature is adjustable down to 0° and another drawer where the humidity is controllable.

The image shows the interior of a wine cabinet. At the top, the brand name 'GAGGENAU' is printed in white on a dark surface. Below, several wine bottles are stored on wooden shelves. The lighting is warm and focused, highlighting the bottles and the texture of the wood. The overall atmosphere is sophisticated and elegant.

GAGGENAU

## Wine climate cabinets

The perfect way to preserve, protect and, should you choose glass doors, present your collection. A choice of five glare-free lighting scenarios can be chosen using the TFT touch display which also controls up to three independent climate zones.

An interior of stainless steel with fully extendable, oak and anthracite aluminium bottle trays, keep the precious contents safe. Further safeguards are provided by the cabinets' low vibration, humidity regulation and activated charcoal air filter.

Solid door, handleless option  
Cushioned door closing system  
Five preset lighting scenarios  
Warm white, glare-free LEDs  
Capacity 70 bottles

The extraordinary, becomes connected.

Gaggenau and Home Connect\*

### The difference is Gaggenau.

This is the beginning of the future of cooking. Aided by a digital device, the private chef can, for instance, preheat the oven, turn on ventilation, start the dishwasher, download digital user manuals and have a technician run a diagnostic check, all remotely.

Integrating into different home managements systems ensures the kitchen remains the heart of the digital home. The private chef can ask Amazon Alexa to prepare a cup of coffee and turn on the ventilation while checking remaining time of the oven.

- Connect: Remotely control\*\* and monitor. Enable remote diagnosis by an online technician.
- Access: Download user manuals and utilise our partnering network.
- Integration: Compatible with different home management systems.

This is just the start, explore the possibilities at [home-connect.com](http://home-connect.com).

\*The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country. For further information please check: [home-connect.com](http://home-connect.com).

\*\*Not applicable for cooktops, cooktops are not intended for unattended use – cooking process must be supervised.

The difference is Gaggenau.
