

Vario Cooling  
400 and 200 series

**GAGGENAU**

Cooling, that makes a statement.

The new Gaggenau Vario cooling 400 series appliances are fully integrated and can be finished in the same material as the rest of your kitchen furniture or as a single sheet of stainless steel; with or without a handle. Wine cabinets are offered with glass doors framed in either the kitchen's furniture material or in stainless steel as a special accessory. Push-to-open doors effortlessly reveals an uncluttered stainless steel interior with dark anthracite aluminium elements and clear glass shelving illuminated by warm white, glare-free LEDs.

Personal preferences can be programmed into the intuitive TFT touch display. The placement of the shelving and solid anthracite aluminium door racks can also be personalised, being easily adjusted using the flexible, near-invisible, rail system. This allows side by side installations to mirror shelving arrangements and present aligned shelves and door racks to the viewer.

Refrigerators house one fresh cooling drawer whose temperature is adjustable down to 0° and another drawer where the humidity is controllable.

## Vario 400 wine climate cabinet

The perfect way to present, preserve and protect your precious wine collection – with UV-protective glass doors. A choice of five glare-free lighting scenarios can be chosen using the TFT touch display which also controls up to three independent climate zones.

An interior of stainless steel with fully extendable, oak and anthracite aluminium bottle trays, keep the precious contents safe. Further safeguards are provided by the cabinets' low vibration, humidity regulation and activated charcoal air filter.
