16 generations of heritage

1683, Ludwig Wilhelm von Baden, one of the most powerful aristocrats in Europe at the time, creates a hammer and nail forge in the Black Forest near the hamlet of Gaggenau.

Every hammer blow from that original foundry guides our metalwork today. Our heritage enables the continual creation of the exceptional, in every single appliance we craft and experience we provide.

The difference is...

Built by hand

After more than 300 years, we still handcraft much of what we produce. Every process, from shaping the initial sheet of steel to assembling our digital interface in our cleanroom, passes through a skilled craftsperson's hands, with pride.

The professional kitchen principle

We take our cue from the professional's kitchen, where everything exists to serve the chef. Innovations that aid the chef are embraced and function is everything.

Quality in all things

Everything we do is beyond the norm, from the materials we use, the craftspeople we employ, to the quality control we are zealous about.

Discover the dedication to craftsmanship, heritage and performance on our website.

Create your aesthetic statement

Individually accomplished, exceptional together

The modern kitchen represents the harmonious interplay of cooking, living and entertaining. Gaggenau appliances inspire exceptional cuisine while also drawing the eye with their sculptural presence, celebrating both function and form. Choosing from a palette of authentic materials, each Gaggenau series of appliances offers key optical highlights that reveal a clear vision for any space, be it a wide-open social setting or an enclosure dedicated to cuisine creation.

Designed to be together, Gaggenau appliances perfectly complement one another functionally and visually, connecting the room, home and vision.

Installation at Milan Design Week 2022, Italy

More than just on show

Gaggenau @ Milan Design Week

Gaggenau created an architectural installation to exhibit at Milan Design Week 2022.

In the grounds of the iconic villa Necchi Campiglio, 'A Statement of Form' entertained and informed guests, offering interactive and artistic displays involving Salvatore marble, Kaufman ceramic tiles, Gaggenau appliances and Chef Christian Jürgens from three Michelin starred restaurant Überfahrt.

Visitors were able to enjoy a full sensory experience from Gaggenau.

Bodegas y Vinedos Verum vineyard, Spain

Respected by Gaggenau

A tribute to the extraordinary

'Respected by Gaggenau' is our deeply-felt commitment to supporting like-minded artisans in the culinary, viniculture and design fields. Through the initiative, we have scoured the globe to unearth and showcase extraordinary farmers, producers and makers that strive for the best and who inspire and enable others. Such artisans share our ethos of making a difference by being masters in their field.

In the Culinary category, the family farm Salumi Bettella of Italy triumphed by cherishing their pigs and creating incredible Italian pork and cured meats. In the field of Viniculture, Spanish winemaker Elías López Montero is single handedly raising the reputation of La Mancha, with his traditional grapes and techniques. Apparatu, also in Spain, is the Design recipient, their utterly inventive ceramic designs straddle the world of craft, art and commerce.

Respected by Gaggenau is an ongoing, global initiative with local artisans often being celebrated in their native showrooms around the world.

Ovens

The epitome of culinary excellence,
the object of desire for the chef:
the Gaggenau oven.

400 series
200 series
EB 333

Ultimately, the ovens 400 series are
the promise of culinary greatness.

Ovens 400 series

What the professional chef comes home to

The Gaggenau oven, combi-steam oven or combi-microwave oven is an aspiration for many, a promise to guests, a calling for the chef and a statement to the designer. Inspired by the professional kitchen, it offers a considerable number of advantages, such as being hand-crafted from the finest materials, ovens offering 550 °F capability and heated air catalysts to remove grease and odors. Every Gaggenau oven is made for the keen chef while being designed for the home.

Our stainless steel under full glass door makes a statement in any kitchen.

Oven, fully automatic espresso machine, combi-steam oven,
warming and vacuuming drawers 400 series

Fully-automated espresso machine, combi-steam oven,
combi-microwave oven, oven, vacuuming drawer 400 series

The luxury of exceptional capability

Cook with intense heat, without feeling it

Each of our 400 series ovens will more than satisfy the most demanding of chefs, with reassuring professional characteristics at every turn.

The distinctive solid stainless steel rotary knobs and TFT display provide intuitive control over the 17 cooking functions.

Touch the screen and the handleless door that sits proud of the surface, calmly opens, as much as 180° wide. Four layers of glass ensure a cool door regardless of internal temperature, even during the 905 °F pyrolytic cleaning program. Each layer of glass perfectly renders colors, allowing you to accurately judge the browning of dishes, which can be achieved evenly using the rotisserie spit.

The multiple core temperature probe measures the temperature inside your dish to within one degree of accuracy, automatic programs assist the home chef while the convenience of Home Connect allows you to control and monitor it remotely. In every sense of the word, this oven Combi-steam ovens and ovens 400 series is proud.

30 inch combi-steam oven, oven and warming drawer 400 series

Automatic cleaning system

Fully master the power of steam

Create your masterpiece

Having introduced steam into the private kitchen over twenty years ago, we have relentlessly refined it. The latest combi-steam ovens, available connected to a fixed water supply, offer an enlarged cavity with which to master the culinary style.

Our chef assistance with adjustable automatic programs, five humidity levels, and up to 450 °F alongside a full surface grill behind glass encourages you to perfect your steaming. In short, it not only steams, but braises, bakes, browns, grills, gratinates, regenerates, sous-vides and even extracts juice. After which, it cleans itself using its sophisticated automatic cleaning system and its own water supply.

Water tank for decaling

Vacuuming drawer 400 series

Making steam a pleasure

Cooking with nuance

As your masterpiece is being created, ensure it is beautifully illuminated. Discreet LEDs bathe your dish in soft white light, without glare thanks to a non-reflective back wall. Another thoughtful touch is the condensing of excess steam, simply to ensure the chef is not engulfed in a billowing cloud when opening the door.

Steam adores a vacuum

Add the vacuuming drawer under your oven or counter and sous-vide might almost become your convenience food. With different vacuum levels and sizes of bags, you will be able to lock in flavors, preserve ingredients and marinade in a third of the time. With the ability to vacuum outside of the drawer you can also enjoy opened wine even after the following night.

Glare-free illumination

24 inch combi-steam oven 400 series

Accessory baking stone and heating element

3-point core temperature probe

The accoutrements of baking

Accessory pull-out system and Gastronorm roaster

Within the oven

The 3-point core temperature probe is more than a thermometer for meat, fish, bread or dough. The readings from the inside of the dish will enable the oven to regulate its temperature and continually adjust its timer, giving you an updated cooking time.

Accessories can unlock an entire culinary potential: the baking stone's intense heat is the secret ingredient for crisp tarte flambé, pizza bases and bread; there really is no alternative to cooking directly onto 550 °F.

Accessory pull-out systems, Gastronorm roasters and inserts as well as variable trays and pizza peels will complete your oven's abilities, and yours.

Watch our films of the ovens 400 series on our website and YouTube channel.

Fully automatic espresso machine 400 series

The espresso machine

Your coffee, perfected

Water is kept consistently heated throughout the coffee brewing process, releasing the aroma while avoiding the bitter compounds. The insulated milk container is automatically weighed and will alert you if there is insufficient milk (or milk alternatives) or if you should check it for freshness.

A multitude of beverages can be made, including 12 types of coffee with up to 8 personalized options. Adjust the size, temperature, strength, milk to coffee ratio and number of cups to make a coffee, yours.

Warming cups is only the beginning...

The three sizes of warming drawer can warm cups for the perfect coffee and bring dinner plates up to serving temperature to allow intricate plating without the food getting cold. Adjust temperature levels and be even more creative with our warming drawer by proofing dough, defrosting, browning or even slow cooking.

Warming drawer 400 series

Oven, fully automatic espresso machine, combi-steam oven and warming drawers 400 series

The oven 200 series offers a flush aesthetic with stainless steel handles.

Oven, fully automatic espresso machine,
combi-microwave and warming drawers 200 series

Ovens 200 series

A matter of taste

A more subdued aesthetic defines the 200 series: it sits flush to the surface, its handles match those of your refrigerators 200 series, it does not dominate, yet it promises all the culinary prowess that the ambitious private chef could hope for. The ovens also utilize the distinctive solid stainless steel control knobs and TFT display. From here you control up to 13 heating methods, up to 550 °F and the baking stone ability, for baking as intense as a brick oven. Home Connect enables remote control and diagnosis is available on the oven.

Oven, fully automatic espresso machine,
combi-microwave oven and warming drawer 200 series

Combi-microwave oven 200 series

Combi-microwave

More than a microwave

Microwave, convection oven, broiler or any combination of all three makes this more than a time-saver. Having said that, you can roast dishes in a third of the time and as the name suggests, the Quick heat function achieves cooking temperatures faster.

Up to 50 of your favorite recipes can be saved and you can create a cooking sequence of different heating methods and times. For instance, defrost using the microwave, cook with a mix of microwaves and convection (to better retain the ingredients' moisture) and finally brown using the broiler.

Oven, fully automatic espresso machine and warming drawer 200 series

Fully automatic espresso machine and warming drawer 200 series

The espresso machine

Be your best Barista

Brew up to 12 types of beverages, and have the machine remember 8 personalized favorites, adjusting strength, temperature, amount of milk and coffee and number of cups. Make other hot water and milk drinks easily, the insulated milk container is even situated on a weighing scale, allowing the machine to warn you if the milk is running too low to make your beverage.

At every stage of its preparation, your coffee's water is kept at a constant temperature, to release the aroma but not the bitter compounds.

It does more than warm

The warming drawer can warm dinner plates and then coffee cups for the perfect coffee and bring dinner plates up to serving temperature for intricate plating without loss of heat. You can be even more creative by proofing dough, defrosting, browning or even slow cook an actual meal.

Fully automatic espresso machine and warming drawer 200 series

Explore more on our website about our espresso machine 200 series.

The EB 333, our 36 inch oven

The oven EB 333

Cook with an icon

This is a culinary icon, and has been for over 30 years. The entire front, all 36 inches of it, is the door, coming in at 44 pounds thanks to five layers of glass keeping the outside cool while the inside is a raging 550 °F. Hand-crafted from a single sheet of 3 mm thick stainless steel, the door is cleverly cantilevered to gently close and easily open, while the glass is carefully formulated to insulate without distorting colors, allowing you to see exactly how the three chickens on the rotisserie spit are progressing.

The EB 333 is the professional chef's final aspiration. The level of craftsmanship required to make it is such that daily production rarely exceeds single figures, something you will appreciate as you enjoy it decade after decade.

Watch the award-winning EB 333 film and interviews on YouTube and our website.

Cooktops and ventilation

Gaggenau cooktops and ventilation systems do not just look the part; designed with performance, discretion and aesthetics in mind, they are inspired by the professional kitchen.

400 series
Vario 400 series
200 series
Vario 200 series

The cooktops and ventilation 400 series adhere to the Gaggenau principle of exceptional materials, designed with insight and assembled with skill by craftspeople.

Cooktops and ventilation 400 series

Cook, ventilate, entertain

As the kitchen becomes the new entertainment center, cooktops must appeal visually and the extraction of steam and grease from the atmosphere becomes more vital. Cooktops and ventilation are intrinsically linked in your kitchen.

Designed for the spacious kitchen, impressive in scale and performance, our Vario 400 series cooktops offer up to a full 36 inches of induction cooking or gas with which to be creative. The modular Vario cooktop options can extend even further: induction, gas, Teppan Yaki, electric grill and downdraft ventilation, can connect together as one cooking arena.

To remove distractions, and avoid becoming one, our ventilation systems use quiet motors. Choose from the minimalist downdraft options, or wall-mounted and island hood statement pieces. All are designed to complement your cooktops 400 series.

Explore the 400 series at [gaggenau.com](https://www.gaggenau.com)

Vario configuration with Teppan Yaki, gas cooktop and downdraft ventilation paired with EB333 oven

Full surface induction cooktop 400 series

Full surface induction cooktop 400 series

The full surface induction cooktop

For those of unlimited imagination

The full surface induction cooktops represent 30 or 36 inches of flush- or surface-mounted limitless creative space. Unconstrained by any white lines, the black glass is absolute in its devotion to minimalism. Beautiful alone, perfect when coupled with our modular Vario cooktops, they offer freedom for the kitchen designer and flexibility to the chef: up to five or six pans can be placed anywhere on their perfectly black surface. Move the pans around, the heat and timer settings follow. Add the Teppan Yaki accessory or utilize the Professional cooking function, which allows you to move the pans between different pre-set temperature zones without touching the controls.

The large TFT touch display invites you to intuitively scroll through the 17 power levels, timers or even compatible ventilation settings using its Home Connect ability.

Explore the full surface induction cooktop at [gaggenau.com](https://www.gaggenau.com)

Control and installation

Total, subtle control

Solid stainless steel, illuminated controls of the 400 series show which cooking zone is in use or cooling down and can be easily installed on the top or front of the worktop – to hand, without distracting the eye, just as in the professional kitchen. Alternatively, the full surface induction cooktop 400 series offers the chef a large touch display to scroll through their options.

Consider placement

All 400 series cooktops offer surface or flush mounting in any favored configuration. Either a visible, 3 mm thin stainless steel frame sits upon the worktop or the cooktop is embedded into the worktop, the choice is yours.

Surface mounting

Flush mounting

Solid stainless steel control knobs

Flex induction cooktop

A depth of inspiration

This induction cooktop offers an ample, adaptable 36 inch wide surface. You are able to expand its cooking zones to accommodate larger and longer pans or a Teppan Yaki. The center ring accommodates a round bottom wok when used with an accessory wok ring, or a variety of standard pots.

The illuminated stainless steel knobs and clear orange and white display, achieve control over the twelve power levels.

For those with things to do and water to boil, the temporary booster function turns large volumes of liquid from tepid to tempestuous in seconds.

The frying sensor function enables you to cook like a chef. For gentler and healthier frying, this function gradually increases the heat while the display shows the progression. The chef can choose from any one of five heat settings.

Explore the flex induction cooktop 400 series
at gaggenau.com

Flex induction cooktop 400 series

47" retractable downdraft ventilation, Vario gas wok, gas cooktop and Teppan Yaki 400 series

Clearing the air, at source

The addition of unseen ventilation

The retractable downdraft ventilation rises regally from the island behind the cooktop, capturing the vapor and odors while directly illuminating the cooktop. Having accomplished its task, it sinks back down level with the surface.

The 36 or 47 inch retractable downdraft ventilation draws steam and vapors in, at source, before they pervade the atmosphere. The quiet fan and space-saving metal ducting ensure discreet efficiency of the downdraft far in excess of its minimal size without sacrificing cabinetry space underneath.

Gas cooktop 400 series

The full power of gas

Gentle warmth, immense heat, total control

Hand-crafted using the highest quality materials of stainless steel, brass and cast iron, this is the cooktop for the demonstrative chef who needs the space to wield multiple pans. It stretches out for a full three feet. Beneath cast iron supports, a large central wok or paella burner is surrounded by two high power and two standard burners, all brass.

Full electronic power level regulation provides precise and reproducible flames, by turning the gas on and off it allows the gentlest of simmering and at full power enables wok and flash frying. When dealing with up to 59,700 BTU of heat, direct control is important.

Explore the gas cooktop 400 series at gaggenau.com

The Vario cooktops and ventilation 400 series combine to not only empower, but also inspire, the creative chef.

Vario cooktops and downdraft 400 series

Create your creative space

The modular Vario cooktop range inspires the chef to create their bespoke workstation, one that suits their way of cooking and advances their ambitions. The chef can build a modular, surface- or flush-mounted cooktop, from induction, gas, Teppan Yaki and electric grill options, all of which can be interspersed with the downdraft to remove vapor at source. Professional, solid stainless steel control knobs and a 3 mm thin stainless steel frame ensure the array of appliances are an aesthetic success.

Protect your creative space from grease and odors. Provide powerful ventilation, such as the downdraft or retractable downdraft ventilation, and overhead ventilation such as the island or wall-mounted hoods.

Explore the Vario 400 series at [gaggenau.com](https://www.gaggenau.com)

Vario configuration: induction, electric grill, Teppan Yaki, gas cooktop and downdraft ventilations 400 series

Vario configuration: wok induction, flex induction,
downdraft ventilation 400 series

Vario cooktops and downdraft 400 series

Induction or gas? Both

All Vario 400 series cooktops can be installed flush- or surface-mounted. Everything from the 6 inch wide downdrafts, 15 inch single cooktops such as induction, gas, Teppan Yaki, electric grill, through to a 36 inch induction or gas cooktop.

The gas burners place raw power at your disposal. Fully precise electronic control over the flame enables the gentlest simmering and the fiercest of flames, which automatically re-ignite if they are blown out. The 15 inch single wok or paella burner is all consuming with several flame rings in one burner, alternatively you can select a 36 inch gas cooktop with five brass burners.

| Explore the Vario configurations at [gaggenau.com](https://www.gaggenau.com)

Vario configuration: flex induction, downdraft ventilation,
Teppan Yaki 400 series

Tailor your culinary scenario

Choose something special

The electric grill and Teppan Yaki are specialty appliances. Both have two zones, enabling simultaneous heating and warming on a single surface. The electric grill lets you roast and grill together by replacing one half of the grill with a griddle plate.

Since its innovation in 1976, our downdraft ventilation has been performing quietly and invisibly, clearing the air for over four decades. Utilising the same stainless steel control knobs as the cooktops, the downdraft blends in as it draws steam and odor down into the worktop before they offend the chef.

| Explore the Vario configuration at [gaggenau.com](https://www.gaggenau.com)

Vario configuration with gas cooktops and downdraft ventilation paired with EB333 oven

Vario configuration with Teppan Yaki and full-surface induction cooktop with 47" 400 series retractable downdraft paired with 24" Oven, combi-microwave and warming drawer

Island Life

Island cooking in an open-plan space presents an alternative to the traditional range and hood placement against a wall. Entertain family and friends with a clear view of the sunset, all possible with Gaggenau integrated downdraft ventilation and retractable downdraft ventilation.

Remove vapor, heat and unwanted aromas at the source, without the need for a hood that obscures your vision or drowns out your conversation. The intelligent design of the ducting and blowers allows you to place ovens below the downdraft ventilation, in essence creating a bespoke range.

| Explore the Vario configurations at [gaggenau.com](https://www.gaggenau.com)

The cooktops and ventilation 200 series: create a cooking space that enables, inspires and complements your kitchen.

Cooktops and ventilation 200 series

Professional demands, private space

With controls conveniently situated on the appliance the cooktops 200 series offers the chef a concentrated area to create the extraordinary, with ventilation to match. Tailor your cooktop to your ideal culinary scenario by seamlessly joining together our modular options from the Vario cooktops 200 series.

30 or 36 inch stand-alone gas or induction cooktops can be paired with island or wall hoods. Additionally, the 12 and 24 inch Vario cooktops including gas, induction, Teppan Yaki, and electric grill can be interspersed with downdraft ventilation. All are designed to perform exceptionally to professional standards.

| Explore the 200 series at [gaggenau.com](https://www.gaggenau.com)

Vario configuration: Teppan Yaki, induction cooktop, electric grill and downdraft ventilation 200 series

Controls and installation

Control of choice

The 200 series offers two control mechanisms. The Vario range's orange illuminated control knobs are integrated into the cooktop itself. The gentle illumination indicates when the appliance is on, heating up, at the correct temperature or cooling down.

Most of the flex induction cooktops utilize the Twist-Pad control: a stainless steel or black magnetic controller that is removable, for cleaning or to create a more minimalist aesthetic for your kitchen. The bi-colored display ensures clear communication of the cooking zones in use as well as the cooktop power levels.

| Explore more at gaggenau.com

Black control panel and illuminated control knobs

Flex induction cooktop 200 series with Teppan Yaki accessory

Magnetic Twist-Pad controller

Flex induction cooktops

A cooktop to suit every ambition

The 30 or 36 inch induction offers a cooking surface that can transform into a clean, clear, flush surface: the black printing is subtle and most have a magnetic Twist-Pad that is simply removed from sight when not in use.

The flex induction cooktops are for the enthusiasts who want to express themselves beyond the restrictions of the normal sized cooking zone. For larger pans or accessories such as the Teppan Yaki plate, simply touch a button and merge two zones into one large one.

Pans can be moved within the enlarged cooking areas and the heating level will follow them. The frying sensor function enables you to cook like a chef. For gentler and healthier frying, this function gradually increases the heat while the display shows the progression. The chef can choose from any one of five heat settings. And when you have finished creating, the visual elements virtually disappear into your surface.

Ventilation as a statement

Centerpiece of the kitchen

The 40 inch island hood is impressive. Contained within the stainless steel frame lies the recessed filters, dishwasher-safe grease filter, low noise fan and dimmable lights. A 36 inch wall-mounted option is also available.

Island hood 200 series

Visor hoods 200 series
Cooktop – European model shown

Hidden ventilation

Discreetly effective

The visor hood is an intelligent, space-saving solution, sitting within the confines of a 24 or 36 inch width. Invisible and quiet, it provides dimmable lights, three power levels, automatic function and glass screen, which extends beyond the cabinets when needed.

Gas cooktops

Aspirations achieved

The gas cooktops in the 200 series present you with a choice of size and aesthetic. The Vario gas cooktops vary from 12 to 24 inches and from one to four burners, while the stand-alone 36" cooktop features five brass burners. Integrated controls place the nine mechanically regulated power levels at your disposal.

These are cooktops designed to be both simple to use and fully capable of creative, professional cooking.

Explore the gas cooktop 200 series at gaggenau.com

For the chef with professional tastes.
The 200 series.

Vario cooktops and ventilation 200 series

Grand culinary ambitions, enabled

The range of Vario options enables a truly bespoke, personalized kitchen. As much about aesthetics as scale, the Vario 200 series distinguishes itself through its anodized aluminium, black control panels incorporated into the cooktops and uniform rectangular shape of the Vario appliances.

For the gas-centric chef, mechanically controlled power regulation precisely controls the nine levels of heat, ensuring replicable results.

Aspiration, circulation and extraction

Since 1976, our downdraft ventilation has quietly outperformed its small size. Our current 6 inch wide model is able to extract to the outside or recirculate, automatically if preferred. Larger ventilation in the 200 series includes wall-mounted and island hoods and visor hoods tucked into kitchen cabinetry. There is a 200 series option that complements your kitchen.

Vario gas cooktop 200 series

gaggenau.com

Vario configuration: gas cooktop, induction, Teppan Yaki and downdraft ventilations 200 series

Vario configuration: Teppan Yaki, induction,
electric grill and downdraft ventilations 200 series

Design your cooking area

Create directly on the heat

The kitchen powered exclusively by electricity and the chef with a penchant for cooking without pans will be drawn towards the stainless steel Teppan Yaki and the electric grill's two zones.

The Teppan Yaki gives the thrill of even searing at 480 °F or it can provide a gentle warming plate, quickly becoming your cooktop of choice.

In either case, the quietly powerful downdraft ventilation will clear away any excess vapors from the atmosphere.

Clear the air from the worktop

The downdraft ventilation now offers a larger, wider, easier to clean opening of 6 inch width to remove more air; a more effective double filtration surface; and compact metal ducting to work quietly unnoticed in the kitchen unit. Exclusive metal ducting allows for full use of cabinet space below the work surface. The automatic function with an air quality sensor enables the quietest, most efficient automatic removal of steam and odors without your intervention, allowing you to concentrate on the cuisine.

GAGGENAU

Cooling

Extending the freshness of your ingredients and presenting all in its best light.

Vario 400 series
200 series

This is cooling that makes
an architectural statement.

Vario cooling 400 series

Modular, seamless, impressive

A fully integrated, built-in modular family: the Vario cooling 400 series refrigerators, freezers, fridge-freezers and wine climate cabinets can be partnered in a multitude of ways. You have the flexibility to create an impressive, stainless steel clad, elegant cooling wall, with or without handles. Alternatively, the handleless options are able to disappear discreetly behind your kitchen furniture.

The new Vario cooling 400 series is reduced to the essence of pure refrigeration and an impressive design interior. You gently push the enormous door and it effortlessly opens to a professional-grade stainless steel interior with modern, anthracite aluminium elements and almost imperceptible clear glass shelving. As you approach the 24 inch freezer, the ice and water dispenser illuminates in anticipation.

The minimalist internal aesthetic is accentuated by warm white, glare-free spotlights that dramatically and flatteringly illuminate your all-important ingredients.

Vario freezer and refrigerator 400 series

Vario refrigerator and freezer 400 series

Fully extendable freezer drawer and warm white, glare-free LED lights

Effortless access to fresh ingredients

Push to open and...

The two opening assist options allow even the largest and heaviest of doors to be opened effortlessly, either by pulling or with a gentle push for the handleless option.

As you would expect, cooling is accurate to within a single degree. Ideal storage conditions are met inside the cooling drawer, preserving your meat and fish for longer, thanks to temperatures close to or at 32°F.

Utilising the same TFT touch display as our ovens ensures you can effortlessly navigate the system, alternatively, you can control temperatures remotely via Home Connect.

To produce a reduced, pleasingly uniform, appearance: the easily adjustable, nearly invisible rail system, allows those so inclined to align the height of the shelves and solid aluminium door bins of their refrigerator and freezer.

Wine climate cabinets

Protect, present, prepare.

Vario 400 series
400 series

A wine climate cabinet that preserves your wines under precise temperatures, showcases your collection and enhances the prestige of your kitchen.

Vario wine climate cabinets 400 series

Protect and serve

Your wine needs to be stored, protected, showcased and prepared for enjoyment. These are competing functions that your wine climate cabinet, equal to a wine cellar, achieves year after year with unflappable aplomb.

Behind its 18 or 24 inch door frames of existing furniture material or stainless steel, with or without handles, lies a sanctuary free from disturbance. Up to three separate temperature zones can be set between 41 °F and 64 °F, replicating a long-term cellar environment and the perfect drinking temperatures.

Meanwhile, five pre-programmed light options, crafted oak bottle presenters and fully extendable trays exhibit your coveted collection with due reverence. Humidity is kept constant, sound is muffled, vibrations suppressed, aromas are filtered by activated charcoal while the treated glass doors block UV rays. Yet all this security is powerless to stop you gently pushing the door and plundering.

Under-counter wine climate cabinet

The under-counter cellar

The under-counter wine climate cabinet integrates perfectly into any kitchen while offering two climate zones and even a dimmable presentation light. Despite fitting into the constrained space under a counter, it holds up to 34 bottles in perfect comfort.

The interior environments of all wine climate cabinets have been constructed with materials designed to have no effect on aroma or taste, with the internal air even being passed through activated charcoal filters. Exceptional engineering has gone into making the compartment virtually vibration-free and the cushioned door closing system ensures you do not disturb any remaining bottles.

Discover more about our under-counter wine climate cabinets on our website.

Under-counter wine climate cabinet 400 series

Dishwashers

Clean with care and intelligence,
before revealing it beautifully.

400 series
200 series

A modern interior space featuring large, textured concrete walls and a large window. A spherical pendant light hangs from the ceiling. The window offers a view of a body of water and distant mountains. A leather chair is partially visible through the window.

Robustly effective and incredibly gentle, in the same wash.

Dishwasher 400 series, flex hinge

Dishwashers 400 series

Protects the precious

The handleless dishwasher 400 series features all the little, and not so little, touches you have come to expect from us. A long-stemmed glass holder and a silvercare cartridge accessory ensure the fragile are protected. Zeolite technology allows for gentle drying, saving your delicate glass and porcelain from excessive heat. The alternate accessory of a third rack neatly contains enough space to safely stow small bowls and cups.

This is a dishwasher with a deep regard for your prized possessions.

Responsive to your whims

You are able to personalize the eight programs and six options, shorten the cycle time and temporarily reduce the noise, for instance during a dinner party. All can be achieved easily and remotely from your portable device thanks to the Home Connect app.

The app can introduce you to the myriad of program options and settings as well as suggest the ideal program based on factors such as type of dish and level of soiling. Learning from your feedback it is also able to intelligently perfect a bespoke, wash cycle just for you.

Experience enlightenment from within

An illuminating experience

Push to open the dishwasher and you are greeted by the flattering soft glow of the uniquely illuminated interior. The dishwasher with flexible hinges informs that it is in use via a subtle warm white light in the top left corner. For those without flexible hinges, the program's remaining time is projected upon the floor.

Gentle to the touch

Smooth running rails offer minimal resistance, flowing in and out in a gentle, careful manner, protecting your glass, crystal and crockery with a cushioned closing mechanism. Silicon tipped folding racks protect delicate glasses and provide an additional non-slip surface for cups. The Intensive Plus option divides the lower basket into four areas and allows the Home Connect app user to adjust the amount of spray each area receives, targeting those dishes that require more vigorous attention. A dedicated area in the upper basket can even be set to receive direct water jets for better and gentler cleaning of glass.

| Explore the 400 series at [gaggenau.com](https://www.gaggenau.com)

The perfectly illuminated interior of the dishwasher 400 series

A dishwasher for every occasion, the 200 series.

Dishwashers 200 series

Personalize performance

Meticulous, considerate, and clever, the 200 series dishwasher performs above expectations.

Different heights, up to 6 programs with three adjustable cycle options, a flexible rack system and an Info-Light that projects a red light onto the floor during the wash cycle. These are dishwashers that succeed in making life easier.

Hone your dishwasher's performance. Personalize programs and speed up the cycle while it is running. All can be achieved remotely via the Home Connect app, as can temporarily pausing the sound of the dishwasher, useful when entertaining guests.

Dishwasher 200 series with accessory third rack

Accessory third rack at the top, to stow cups and bowls safely.

Dishwashers 400 and 200 series

The Gaggenau difference

What distinguishes every Gaggenau dishwasher 400 and 200 series, is the detail. The new flexible basket system secures glasses and crystal with silicon-tipped holders that fold down to alternatively offer a non-slip extra shelf. The smooth running rails or new additional rollers provide controlled, effortless movement of the rack and baskets. An end cap regulates the fluid, gentle motion of the baskets. All that can be done to protect the contents, is done, superbly.

There is even an alternate accessory, a top, third rack, giving the user another level to safely stow cups and bowls. Details are more than considered, they are polished to perfection.

The extraordinary is connected

Gaggenau and Home Connect.

Our lives and homes are becoming ever more connected. Our home appliances have always enabled our consumers to create extraordinary cuisine, now digital services are a valuable add-on to this principle as they integrate the kitchen into our modern lifestyles.

Our appliances are being equipped with Home Connect, a platform allowing you to intuitively communicate with your appliance digitally, remotely and at will. Home Connect also offers a wide range of other advantages such as remote diagnostics, voice control, and integration into selected home management systems.

Home Connect, enhancing your time in, and away from, the kitchen. Explore more possibilities on our website.

Download App from Apple App Store (iOS)

Download App from Google Play Store (Android)

The use of the Home Connect functionality depends on the Home Connect services, which are not available in every country. For further information please check:

home-connect.com

Home Connect is a service of Home Connect GmbH.
