### **A** Safety Definitions

#### A WARNING

This indicates that death or serious injuries may occur as a result of non-observance of this warning.

#### 

This indicates that minor or moderate injuries may occur as a result of non-observance of this warning.

**NOTICE:** This indicates that damage to the appliance or property may occur as a result of non-compliance with this advisory.

**Note:** This alerts you to important information and/or tips.

### IMPORTANT SAFETY INSTRUCTIONS

READ AND SAVE THESE INSTRUCTIONS

#### WARNING

When properly cared for, your new appliance has been designed to be safe and reliable. Read all instructions carefully before use. These precautions will reduce the risk of burns, electric shock, fire, and injury to persons. When using kitchen appliances, basic safety precautions must be followed, including those in the following pages.

### **Proper Installation and Maintenance**

Have the installer show you the location of the circuit breaker or fuse. Mark it for easy reference.

This appliance must be properly installed and grounded by a qualified technician. Connect only to properly grounded outlet. Refer to Installation Instructions for details.

This appliance is intended for normal family household use only. It is not approved for outdoor use. See the Statement of Limited Product Warranty. If you have any questions, contact the manufacturer.

Do not store or use corrosive chemicals, vapors, flammables or nonfood products in or near this appliance. It is specifically designed for use when heating or cooking food. The use of corrosive chemicals in heating or cleaning will damage the appliance and could result in injury.

Do not operate this appliance if it is not working properly, or if it has been damaged. Contact an authorized servicer.

Do not obstruct oven vents.

Do not repair or replace any part of the appliance unless specifically recommended in this manual. Refer all servicing to an authorized servicer.

### WARNING

#### **Risk of burns**

To avoid risk of injury, turn off the interior light before cleaning the oven to allow the bulbs to cool down. The bulbs can become very hot when switched on. Keep the light off while cleaning the oven.

#### WARNING

Make sure the appliance and lights are cool and power to the appliance has been turned off before replacing the light bulb(s). Failure to do so could result in electrical shock or burns. The lenses (if equipped) must be in place when using the appliance. The lenses (if equipped) serve to protect the light bulb from breaking. The lenses (if equipped) are made of glass. Handle carefully to avoid breaking. Broken glass can cause an injury.

#### WARNING

Light socket is live when door is open if main power supply is not turned off.

### **Fire Safety**

#### WARNING

NEVER cover any slots, holes or passages in the oven bottom or cover an entire rack with materials such as aluminum foil. Doing so blocks air flow through the oven. Aluminum foil linings may also trap heat, causing a fire hazard.

If materials inside an oven or warming drawer should ignite, keep door closed. Turn off the appliance and disconnect the circuit at the circuit breaker box.

#### WARNING

Use this appliance only for its intended use as described in this manual. NEVER use this appliance as a space heater to heat or warm the room. Doing so may result in overheating the appliance. Never use the appliance for storage.

Always have a working smoke detector near the kitchen.

In the event that personal clothing or hair catches fire, drop and roll immediately to extinguish flames.

Have an appropriate fire extinguisher available, nearby, highly visible and easily accessible near the appliance.

Smother flames from food fires other than grease fires with baking soda. Never use water on cooking fires.

### **IMPORTANT SAFETY INSTRUCTIONS**

READ AND SAVE THESE INSTRUCTIONS

#### WARNING

TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A GREASE FIRE, OBSERVE THE FOLLOWING:

- a) SMOTHER FLAMES with a close-fitting lid, cookie sheet, or metal tray, then turn off the burner. BE CAREFUL TO PREVENT BURNS. If the flames do not go out immediately, EVACUATE AND CALL THE FIRE DEPARTMENT.
- b) NEVER PICK UP A FLAMING PAN You may be burned.
- c) DO NOT USE WATER, including wet dishcloths or towels a violent steam explosion will result.
- d) Use an extinguisher ONLY if:
  - You know you have a Class ABC extinguisher, and you already know how to operate it.
  - The fire is small and contained in the area where it started.
  - The fire department is being called.
  - You can fight the fire with your back to an exit.

### **Burn Prevention**

DO NOT TOUCH HEATING ELEMENTS OR INTERIOR SURFACES OF OVEN - Heating elements may be hot even though they are dark in color. Interior surfaces of an oven become hot enough to cause burns. During and after use, do not touch, or let clothing, potholders, or other flammable materials contact heating elements or interior surfaces of oven until they have had sufficient time to cool. Other surfaces of the appliance may become hot enough to cause burns. Among these surfaces are oven vent openings, surfaces near these openings and oven doors.

Exercise caution when opening the appliance. Standing to the side, open the door (or drawer) slowly and slightly to let hot air and/or steam escape. Keep your face clear of the opening and make sure there are no children or pets near the unit. After the release of hot air and/or steam, proceed with your cooking. Keep doors shut unless necessary for cooking or cleaning purposes. Do not leave open doors unattended.

#### WARNING

#### **Risk of burns**

The inside of the appliance door becomes very hot during operation. Always open the appliance door as far as it will go. Ensure that the appliance door does not swing back. Avoid contact with the inside of the appliance door.

Do not heat or warm unopened food containers. Buildup of pressure may cause the container to burst and cause injury.

Use caution when cooking foods with high alcohol content (e.g. rum, brandy, bourbon) in the oven. Alcohol evaporates at high temperatures. There is a risk of burning as the alcohol vapors may catch fire in the oven. Use only small quantities of alcohol in foods, and open the oven door carefully.

Always place oven racks in desired location while oven is cool. Always use oven mitts, when the oven is warm. If a rack must be moved while oven is hot, do not let potholder contact the heating elements.

#### CAUTION

To avoid possible injury or damage to the appliance, ensure rack is installed exactly per installation instructions and not backwards or upside down.

Always use dry potholders. Moist or damp potholders on hot surfaces may result in burns from steam. Do not let potholder touch hot heating elements. Do not use a towel or other bulky cloth.

Secure all loose garments, etc. before beginning. Tie long hair so that it does not hang loose, and do not wear loose fitting clothing or hanging garments, such as ties, scarves, jewelry, or dangling sleeves.

### **Child Safety**

When children become old enough to use the appliance, it is the responsibility of the parents or legal guardians to ensure that they are instructed in safe practices by qualified persons.

Do not allow anyone to climb, stand, lean, sit, or hang on any part of an appliance, especially a door, warming drawer, or storage drawer. This can damage the appliance, and the unit may tip over, potentially causing severe injury.

### **IMPORTANT SAFETY INSTRUCTIONS**

READ AND SAVE THESE INSTRUCTIONS

Do not allow children to use this appliance unless closely supervised by an adult. Children and pets should not be left alone or unattended in the area where the appliance is in use. They should never be allowed to play in its vicinity, whether or not the appliance is in use.

### CAUTION

Items of interest to children should not be stored in an appliance, in cabinets above an appliance or on the backsplash. Children climbing on an appliance to reach items could be seriously injured.

### **Cleaning Safety**

IMPORTANT SAFETY NOTICE: The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list of substances known to the state to cause cancer, birth defects or other reproductive harm, and requires businesses to warn customers of potential exposure to such substances. The burning of gas cooking fuel and the elimination of soil during self-cleaning can generate some by-products which are on the list. To minimize exposure to these substances, always operate this unit according to the instructions contained in this booklet and provide good ventilation.

When self-cleaning, confirm that the door locks and will not open. If the door does not lock, do not run Self-Clean. Contact service.

Wipe out excessive spillage before self-cleaning the oven.

Birds have very sensitive respiratory systems. Keep pet birds out of the kitchen or other rooms where kitchen fumes could reach them. During self-clean, fumes are released that may be harmful to birds. Other kitchen fumes such as overheating margarines and cooking oils may also be harmful.

Keep oven free from grease build up.

### **Cookware Safety**

**NOTICE:** Do not place food directly on oven bottom.

Follow the manufacturer's directions when using cooking or roasting bags.

Do not clean parts or accessories in the self-clean oven.

#### WARNING

#### Risk of electric shock

Use of a wrong core temperature probe can damage the insulation. Use only the core temperature probe intended for this appliance.

### State of California Proposition 65 Warnings:

#### WARNING

This product can expose you to chemicals including vinyl chloride, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

### Causes of damage

### **Environmental protection**

#### NOTICES:

- Accessories, foil, baking paper or cookware on the bottom of the oven interior: do not place any accessories on the bottom of the oven interior. Do not line the bottom of the oven interior with any type of foil or baking paper. Do not place cookware on the bottom of the oven interior when a temperature above 122°F (50 °C) is set. This produces a buildup of heat. Baking and roasting times are no longer correct and the enamel is damaged.
- Water in the hot oven interior: Never pour water into the hot oven interior. Steam is produced. Damage to the enamel can arise due to the temperature change.
- Do not leave moist groceries in a closed oven for an extended period of time. It can lead to corrosion inside the oven.
- Fruit juice can leave stains in the oven. Always remove fruit juice immediately when safe to touch, and wipe up first with a damp and then a dry cloth.
- Cooling with the appliance door open: only allow the oven cavity to cool when it is closed. Even if the appliance door is only open a little, front panels of adjacent units could be damaged over time.
- Highly soiled door seal: the appliance door will no longer close properly during operation if the door seal is highly soiled. Adjoining furniture fronts may be damaged. Always keep the door seal clean.
- Appliance door as a seat or storage surface: do not stand, sit or hang on the appliance door. Do not place any cookware or accessories on the appliance door.
- Inserting accessories: depending on the appliance type, accessories can scratch the door pane when closing the appliance door. Always slide accessories fully into the oven interior.
- Do not hold or carry the appliance by the door handle. The door handle cannot carry the weight of the device and could break off.

Unpack the appliance and dispose of the packaging in an environmentally friendly manner.

### Tips for saving energy

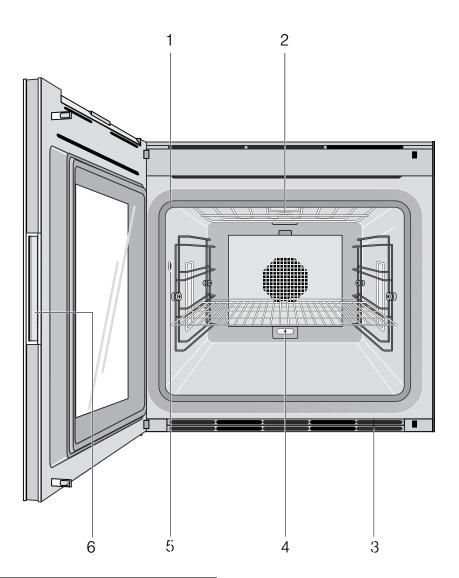

- Open the appliance door as little as possible while cooking, baking or roasting.
- Use dark, black-painted or enameled baking forms. These absorb the heat particularly well.
- It is best to bake several cakes in succession. The oven is still warm. This shortens the baking time for the second cake. You can also slide in two loaf tins next to each other.
- In the hot air mode, you can bake simultaneously on several levels.
- For longer cooking times, you can switch off the oven 10 minutes before the end of the cooking time and you can use the residual heat to finish cooking.

### Getting to know the appliance

You will get to know your new appliance here. We explain the control panel and the individual controls to

you. You are informed about the oven interior and accessories.

### Oven

| 1 | Door seal  |
|---|--|
| 2 | Grill heating element  |
| 3 | Oven vents   |
| 4 | Socket for additional heating element (special accessory for baking stone and roaster) |
| 5 | Socket for core temperature probe  |
| 6 | Recessed handle  |
|   |  |

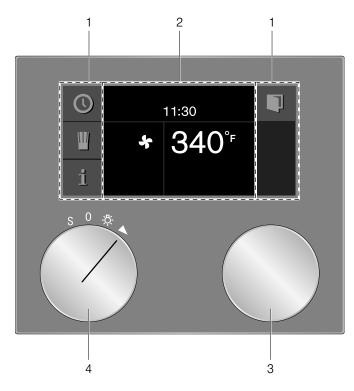

**NOTICE:** Do not place food directly on oven bottom.

Do not obstruct oven vents.

### **Displays and controls**

These instructions apply to different versions of the appliance. Slight deviations are possible depending on the appliance type.

Operation is identical for all appliance versions.

| 1 | Control panel    | These areas are touch-sensitive.<br>Touch a symbol to select the appli-<br>cable function.                            |
|---|------------------|---|
| 2 | Display          | The display shows current set-<br>tings and options, for example.   |
| 3 | Rotary selector  | With the rotary selector you can select the temperature and make other settings.                                      |
| 4 | Program selector | With the program selector, you<br>can select the heating function,<br>the cleaning function or the basic<br>settings. |

### Colors and display

#### Colors

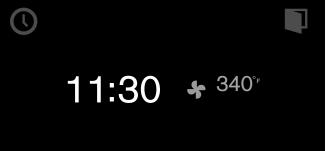

The various colors serve to guide you in the various adjustment situations.

| Orange | First settings    |
|--------|-------------------|
|        | Main functions    |
| Blue   | Basic settings    |
|        | Cleaning          |
| White  | Adjustable values |

#### Presentation

The presentation of symbols, values or the entire display changes depending on the situation.

| Zoom                        | The display of the setting you are just changing is enlarged.   |
|-----------------------------|---|
|                             | Just before it elapses, a duration that is just<br>elapsing is enlarged (e.g. the last 60 sec-<br>onds in the case of timers).  |
| Minimized<br>display screen | After a short time, the display screen is<br>minimized and only the most important<br>things are displayed. This function is the<br>default and can be modified in the basic<br>settings. |
|                             |   |

### Automatic door opening

When you touch the vymbol, the appliance door springs open and you can open it fully with the handle recess at the side.

Automatic door opening does not work when the child lock is activated or in the event of a power failure. You can open the door manually with the handle recess at the side.

### Additional information i and $i^{\tiny (1)}$

By touching the i symbol, you can call up additional information. For example, information on the heating function set or on the current temperature of the cooking compartment.

**Note:** During continuous operation, small fluctuations in temperature are normal after the oven has heated up.

The  $i^{(0)}$  symbol is displayed for important information and action prompts.Important information on safety and operation mode are occasionally shown automatically. These messages either disappear automatically after a few seconds or must be confirmed with  $\checkmark$ .

### Cooling fan

Your appliance has a cooling fan. The cooling fan switches on during operation. Depending on the appliance version, the warm air escapes above or under the door.

After removing cooked food, keep the door closed until the appliance cools down. The appliance door must not be left ajar, as adjoining kitchen furniture may be damaged. The cooling fan continues to run for a while and then switches off automatically.

#### **CAUTION**

Do not cover up the ventilation slots. Otherwise, the appliance will become overheated.

### **Program selection positions**

| Position | Function/heating function | Temperature                                      | Application   |

### Accessories

Use only the accessories included or obtainable from after-sales service. It has been specially adapted to your appliance. Make sure you always insert accessories into the interior the right way round.

Your appliance comes with the following accessories:

Baking tray, enameled

Grill tray

Plug-in core temperature probe

Wire grill tray

### Special accessories

You can order the following accessories from your specialist dealer:

| BA 016 165 | Pull-out system  |
|------------|--|
|            | Fully extendable telescopic pull-out rack and pyrolysis-proof cast frame                 |
| BA 026 115 | Baking tray, enameled, ½" (15 mm)<br>deep  |
| BA 036 165 | Wire rack, chrome-plated, without opening, with feet                                     |
| BA 226 105 | Grill tray, enameled, $1\frac{1}{4}$ " (30 mm) deep                                      |
| BA 046 115 | Glass tray, 1" (24 mm) deep  |
| BA 056 115 | Heating element for baking stone and roaster (230 V)                                     |
| BA 056 125 | Heating element for baking stone and roaster (400 V)                                     |
| BA 056 133 | Baking stone   |
|            | Including baking stone support and<br>pizza paddle (order heating element<br>separately) |
| BS 020 002 | Pizza paddle, set of 2   |
| GN 340 230 | Cast aluminum roaster GN 2/3, 6½"<br>(165 mm) high, non-stick                            |

Use the accessories only as indicated. The manufacturer assumes no liability for incorrect usage of the accessories.

Remove any accessories that are not required during operation from the cooking compartment. Bush for the additional heating element at the back of the cooking compartment: Always leave the cover in during normal operation without the additional heating element.

### Before first use

In this chapter, you can find out what you must do before using your oven to prepare food for the first time. Read the "Safety information" chapter beforehand.

The appliance must be completely fitted and connected.

The "First settings" menu appears in the display after the mains has been connected. You can now set your new appliance:

- Language
- Time format
- Time
- Date format
- Date
- Temperature format

#### Notes

- The "Initial settings" menu only appears when you first connect the power or if the appliance has been without power for several days.
   After connecting the power, first the GAGGENAU logo appears for approx. 30 seconds, then the "Initial settings" menu appears automatically.
- You can change these settings at any time (see the "Basic settings" chapter).

### Setting the language

The default language appears in the display.

- 1 Select the desired display language with the rotary selector.
- 2 Confirm with  $\checkmark$ .

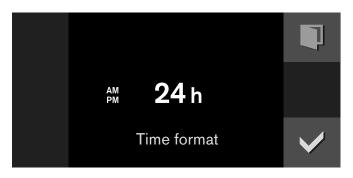

**Note:** When the language is changed, the system is restarted; this procedure takes a few seconds.

### Setting the time format

the two possible formats 24h and AM/PM appear in the display. The default format is 24h.

- 1 Set the required format with the rotary selector.
- 2 Confirm with  $\checkmark$ .

### Setting the time

The time appears in the display.

- 1 Set the required time with the rotary selector.
- 2 Confirm with  $\checkmark$ .

### Setting the date format

The three possible formats D.M.Y, D/M/Y and M/D/Y appear in the display. The D.M.Y is the default.

- 1 Set the required format with the rotary selector.
- 2 Confirm with  $\checkmark$ .

### Setting the date

The default date appears in the display. The day setting is already active.

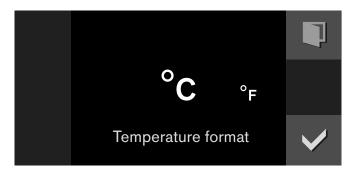

- 1 Set the required day with the rotary selector.
- 2 Switch to the month setting with the > symbol.
- **3** Set the month with the rotary selector.
- 4 Switch to the year setting with the > symbol.
- 5 Set the year with the rotary selector.
- 6 Confirm with  $\checkmark$ .

### Setting the temperature unit

The two possible units  $^{\circ}C$  and  $^{\circ}F$  will appear on the display. The default unit is  $^{\circ}C$ .

- 1 Use the rotary selector to select the unit you require.
- 2 Press ✔ to confirm.

### Completing initial set-up

"Initial set-up complete" appears in the display.

### Confirm with $\checkmark$ .

The appliance enters the standby mode and the standby display appears. The appliance is now ready for operation.

### Heating up the oven

Make sure that there is no leftover packaging in the cooking compartment.

To eliminate the new-appliance smell, heat up the oven with it empty and the door closed. One hour with hot air  $\clubsuit$  at 200 °C is ideal for this.

### **Cleaning accessories**

Before using accessories for the first time, thoroughly clean them with hot soapy water and a soft dish cloth.

### Activating the appliance

### Standby

The appliance is in the standby mode when no function is set or the child lock is activated.

The control panel's brightness is reduced in the standby mode.

#### Notes

- There are various displays for the standby mode.
   The GAGGENAU logo and the time are set by default. Refer to the section entitled *Factory setting* if you would like to change the display.
- The display's brightness depends on the vertical viewing angle. You can adjust the display by way of the "Brightness" setting in the factory settings.

### Activate appliance

In order to exit standby mode, you can either

- Set the function selector,
- Touch a control panel,
- or open or close the door.

Now you can set the desired function. Read the appropriate chapters to learn how to set functions.

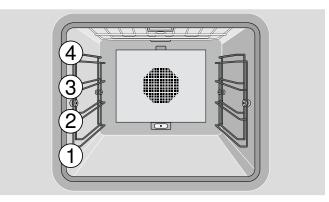

#### Notes

- If "Standby screen = off" is selected in the factory setting, you must turn the function selector to exit the standby mode.
- The standby display appears again if you have not made any settings for a long while after activation.
- The cooking compartment lighting goes out after a little while if the door is open.

### Operating the appliance

### **Oven interior**

The oven interior has four insertion levels. These are counted from the bottom up.

#### 

Do not place anything on the cooking compartment floor. Do not cover it with aluminium foil. A build-up of heat could damage the appliance or cause injury.

#### 

Do not slide any accessories between the shelf positions, or they may tip.

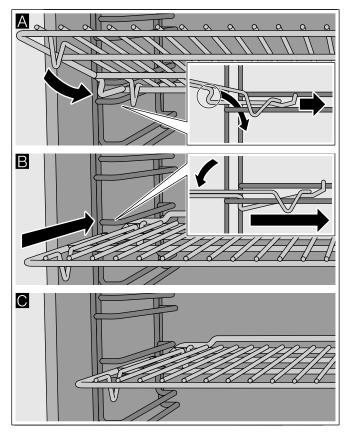

### Inserting the rack

The accessories feature a rack stop function. The rack stop function prevents tilting of accessories when pulling them out. You must insert accessories in the oven interior correctly so that tilt protection will work.

Inserting the rack

1 Tilt the rack to guide the rack stop in between the rails of the rack holders **A**. The rack stop has to face downwards.

Lower the rack and slide it into the oven, so that the rack stop can engage **B**. Make sure the rack's safety rod is at the rear and top **C**.

### **Turning on**

- 1 Set the required heating mode using the function selector. The chosen heating mode and the default temperature are displayed.
- 2 If you want to change the default temperature: set the required temperature with the rotary selector.

The preheating symbol  $\xrightarrow{>}$  appears on the display. The bar continuously shows the preheating status. When the set temperature is reached, a signal sounds and the preheating symbol  $\xrightarrow{>}$  goes off.

**Note:** The oven interior lighting stays switched off at a temperature setting below 160° F (70°C).

#### Switching off:

Turn the function selector to **0**.

### Quick heat

With the "Quick heat" function, your appliance reaches the desired temperature particularly quickly in the top heat, bottom heat, and top/bottom heat types of heating.

To ensure an even cooking result, do not place your food in the cooking compartment until "Quick heat" is complete and the  $\xrightarrow{>}$  heat-up symbol goes out.

Note: The "Quick heat" function is preset in the factory settings. In the basic settings, you can select  $\xrightarrow{\gg}$  Quick heat or  $\stackrel{\frown}{\frown}$  Heat-up.

### Safety shut-off

For your protection, the appliance has a safety shut-off feature. Every heating operation is switched off after 12 hours if the appliance is not operated during this time. A message appears in the display.

Exception:

programming with the long-term timer.

Turn the program selection to **0**, after which you can operate the appliance in the manner to which you are accustomed.

### **Timer functions**

In the timer menu, set:

X Timer

**T** Stopwatch

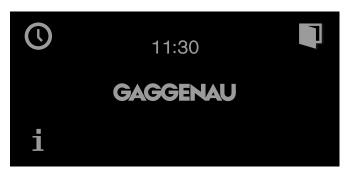

Cooking time (not in the idle state)

() Cooking time end (not in the idle state)

### Launching the timer menu

You can launch the timer menu from any mode. Only from the factory settings, program selection is set to **S**, the time menu is not available.

Touch the 🕔 symbol.

The timer menu appears.

### Timer

The timer runs independently of the other appliance functions. You can enter a maximum of 90 minutes.

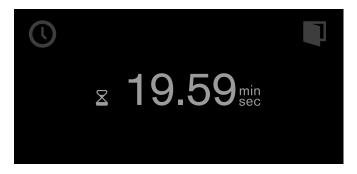

#### Setting the timer

- Call up the Timer menu. The "Timer" function ∑ is displayed.
- 2 Turn the rotary selector to set the desired time.

#### 3 Start with ▶.

The Timer menu closes and the timer starts to run. The symbol for the timer  $\Sigma$  appears on the display and the time can be seen counting down.

A signal sounds once the time has elapsed. The audible signal ceases if you touch the  $\checkmark$  symbol.

You can exit the Timer menu at any time by touching the X symbol. This way, the settings are lost.

#### Suspend timer:

Call up the Timer menu. Select the "Timer" function with  $\mathbf{\lambda}$ , select  $\mathbf{\lambda}$ , and touch the **II** symbol. To let the timer run on, touch the  $\mathbf{\lambda}$  symbol.

#### Switch off the timer early:

Call up the Timer menu. Select the "Timer" function with  $\mathbf{\hat{z}}$ , select  $\mathbf{\hat{z}}$ , and touch the  $\mathbf{\hat{C}}$  symbol.

### Stopwatch

The stopwatch runs independently of the other appliance functions.

The stopwatch counts up from 0 seconds to 90 minutes.

It has a pause function. Therefore, you can stop the timer in between times.

#### Starting the stopwatch

- 1 Launch the timer menu.
- 2 With  $\mathbf{i}$ , select the "Stopwatch" function  $\mathbf{O}$ .

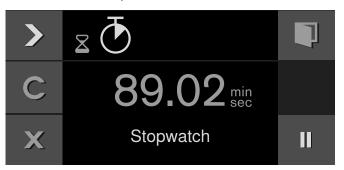

3 Start with ▶.

The timer menu is closed and the time runs. The  $\bar{\mathfrak{O}}$  symbol and the elapsing timer are shown in the display.

#### Stopping and restarting the stopwatch

- 1 Launch the timer menu.
- 2 With >, select the "Stopwatch" function  $\overline{O}$ .
- **3** Touch the **II** symbol.

The time stops. The symbol changes to Start **>** again.

4 Start with ▶.

The time continues to run. Once 90 minutes have been reached, the display pulsates and a signal sounds. It goes off when you touch the  $\checkmark$  symbol. The D symbol disappears from the display. The operation has ended.

#### Switching off the stopwatch:

Launch the timer menu. With  $\mathbf{i}$ , select the "Stopwatch" function  $\mathbf{i}$  and touch the  $\mathbf{C}$  symbol.

### Cooking time

If you set a cooking time for your meal, the appliance switches off heating automatically after this time has elapsed.

You can set a cooking time from 1 minute to 23:59 hours.

### Setting the cooking time

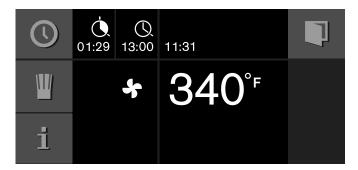

You have set the heating function and temperature and you have placed your dish in the oven interior.

- **1** Touch the  $\bigcirc$  symbol.
- 2 With  $\mathbf{b}$ , select the "Cooking time" function  $\mathbf{b}$ .
- **3** Set the required cooking time with the rotary selector.

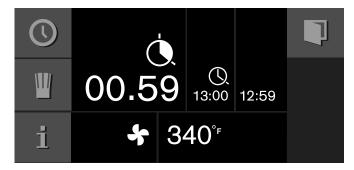

### 4 Start with ▶.

The appliance starts. The timer menu is closed. The temperature, the operating mode, the remaining cooking time and the end of the cooking time appear in the display.

One minute before expiration of the cooking time, the expiring cooking time is enlarged in the display.

The appliance switches off after expiration of the cooking time. The pulsates and a signal sounds. It goes off prematurely if you touch the  $\checkmark$  symbol, open the appliance door or set the program selection to **0**.

#### Interrupting the cooking time:

Launch the timer menu. With  $\rightarrow$ , select the "Cooking time" function . With  $\blacksquare$  interrupt the cooking time. With  $\blacktriangleright$  continue the cooking time.

#### Changing the cooking time:

Launch the timer menu. With  $\mathbf{\lambda}$ , select the "Cooking time" function  $\mathbf{\Phi}$ . Set the cooking time with the rotary selector. Start with  $\mathbf{b}$ .

#### Clearing the cooking time:

Launch the timer menu. With  $\rightarrow$ , select the "Cooking time" function . Clear the cooking time with . Return to normal operation with  $\bigstar$ .

#### Canceling the entire operation:

Set the program selection to 0.

**Note:** You can also change the heating function and temperature during the cooking time.

### End of cooking time

You can defer the end of the cooking time until later.

Example: it is 2 pm. The meal takes 40 minutes to cook. It should be ready by 3.30 pm.

Enter the cooking time and shift the end of the cooking time to 3.30 pm. The electronic circuitry calculates the starting time. The appliance starts automatically at 2:50 pm and switches off at 3.30 pm.

Note that easily perishable foodstuffs must not be left in the oven for too long.

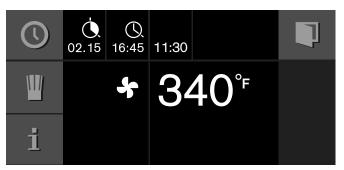

#### Shifting the end of the cooking time

You have set the heating function, the temperature and the cooking time.

- **1** Touch the  $\bigcirc$  symbol.
- 2 With **>**, select the "End of cooking time" function 𝔅.

**3** Set the required cooking time end with the rotary selector.

The appliance assumes a waiting mode. The operating mode, the temperature, the cooking time and the end of the cooking time appear in the display. The appliance starts at the calculated time and switches off automatically when the cooking time has elapsed.

**Note:** If the **()** symbol flashes: you have not set a cooking time. Always set a cooking time first.

The appliance switches off after expiration of the cooking time. The  $\bigcirc$  pulsates and a signal sounds. It goes off prematurely if you touch the  $\checkmark$  symbol, open the appliance door or set the program selection to **0**.

#### Changing the cooking time end:

Launch the timer menu. With  $\rightarrow$ , select "End of cooking time"  $\bigcirc$ . Set the required cooking time end with the rotary selector. Start with  $\blacktriangleright$ .

#### Canceling the entire operation:

Set the program selection to 0.

### Sabbath mode

### Sabbath mode

With this function, the appliance maintains a temperature between 120 and 450°F (50 and 230°C) with the convection heating function.

You can keep dishes warm for up to 74 hours without having to switch on or off.

Note that easily perishable foodstuffs must not be left in the oven for too long.

**Note:** You must activate the Sabbath mode in the factory setting in order to operate the mode.

#### Follow these steps:

- 1 Set the program selector to S.
- 2 Select "Factory setting" with the rotary selector.
- 3 Confirm by touching the **✓** symbol.
- 4 Rotate the selector to Sabbath mode (3).
- 5 Confirm by touching the **✓** symbol.
- 6 Rotate the selector to "activate".
- 7 Corfirm by touching the **✓** symbol.
- 8 Turn the oven off.

#### Setting the Sabbath mode

- 1 Set the program selector to 🔆.
- 2 Touch the ()) symbol. The suggested value of 24h at 185° F (85°C) appears in the display. Start with ▶ - or -

Change the cooking time and the temperature.

- 3 Changing the cooking time (): Touch the () symbol. Set the preferred cooking time with the rotary selector. You can set up to 74 hours. Confirm by touching the ✓ symbol. Then changing the temperature becomes an option.
- 4 Changing the temperature: Set the required temperature with the rotary selector.

#### 5 Start with ▶.

The appliance starts. (J)) and the temperature appear in the display. The Sabbath screen will appear as shown.

The oven and display lighting is off. The control panel is blocked and no tone can be heard when you touch it.

The appliance no longer heats after expiry of the time. The display is blank. Set the program selector to **0**.

#### Switching off:

To cancel the operation, set the program selector to **0**.

### Yom Tov mode

With this function, the appliance is programmed to perform in three stages.

Stage 1 and 2 can be programmed for a maximum total duration of 74 hours. The duration of Step 3 is 1 hour and cannot be modified.

**Stage 1:** maintains a warm temperature of 122° F (50°C) in the convection heating function. The interior oven lights remain off through this stage.

**Stage 2:** the appliance raises to a desired temperature setting and maintains a temperature between 120 and 450° F (50 -230°C). For warming and cooking foods in the convection heating function. The desired time can be adjusted for this stage. The interior oven lights will be on during this time.

Stage 3: maintains a warm temperature of 122° F (50°C) in the convection heating function for 1 hour after stage 2 has ended. The interior oven lights will be on during this time.

Note that easily perishable foodstuffs must not be left in the oven for too long.

#### Setting the Yom Tov mode

- 1 Set the program selector to 🔆 .
- 2 Touch the 🛈 symbol.

The suggested value of 24h at 185° F (85°C) appears in the display.

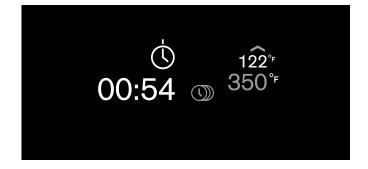

To set Stage 2 cooking time with rotary selector:

- Touch the O symbol to adjust the duration of Stage
   cooking time O.
- 2 Set the desired Stage 2 cooking time with the rotary selector.
- 3 Touch the ➤ symbol to adjust the end of Stage 2 cooking time ③.
- 4 Select the end time with the rotary selector.
- 5 Change the date if needed by touching the symbol to 3 .
- 6 Rotate the selector to the desired date.
- 7 Confirm settings by touching the ✔ symbol.

To set Stage 2 temperature:

- 1 Rotate selector to desired Stage 2 temperature.
- 2 Start with ▶.

The temperatures of Stage 1 and Stage 2 appear in the display. The remaining time to the beginning of Stage 2 is counted down in the display. The Yom Tov screen will appear as shown.

The program will begin with the pre-set warm temperature without light, then advance to the programmed temperature with light until the end of the set date and time, and then maintain the pre-set warm temperature for 60 minutes.

The appliance no longer heats after expiry of the time. The display is blank. Set the program selector to **0**.

#### Switching off:

To cancel the operation, set the program selector to **0**.

### **Personal recipes**

You can save up to 50 individual recipes. You can record a recipe. You can assign these recipes a name so that you can fall back on them quickly and conveniently if you need them.

### Recording a recipe

You can set up to five phases in succession and you can record them.

1 Set the program selection to the required heating function.

The 📱 symbol is displayed.

- **2** Touch the  $\underline{\Psi}$  symbol.
- **3** Choose a free storage location with the rotary selector.
- 4 Touch the  $\stackrel{\text{rec}}{\bullet}$  symbol.

- 5 Set the desired temperature with the rotary selector.
- 6 The cooking time is recorded.
- 7 Recording another phase: Set the program selection to the required heating function. Set the required temperature with the rotary selector. A new phase begins.
- 8 Once the appliance has achieved the desired cooking result, touch the symbol to end the recipe.
- 9 Enter the name under "ABC" (see Section entitled *Entering names*).

#### Notes

- Recording a phase does not begin until the appliance has reached the set temperature.
- Every phase must last at least one minute.
- During the first minute you can change the heating function or the temperature.

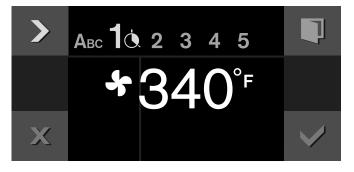

#### Enter the core temperature for a phase:

Insert the core temperature probe in the socket in the oven interior. Set the heating function and temperature. Touch the  $\checkmark$  symbol. With the rotary selector, enter the required temperature and confirm it with  $\checkmark$ .

### Programming a recipe

You have the option of programming and saving up to five phases of preparation.

- Set the program selection to the required heating function. Set the required temperature with the rotary selector. The wymbol is displayed.
- **2** Touch the  $\underline{\Psi}$  symbol.
- **3** Choose a free storage location with the rotary selector..
- 4 Touch the **\\_** symbol.
- 5 Enter the name under "ABC" (see Section entitled *Entering names*).
- 6 Choose the first phase with the ➤ symbol. The heating function and temperature set at the start are displayed. You can change the heating function and temperature with the rotary selectors.

- 7 Choose the time setting with the > symbol.
- 8 Set the required cooking time with the rotary selector.
- 9 Choose the next phase with the > symbol. - or -

Preparation is complete, end input.

Save with ✓.
or Cancel with X and quit the menu.

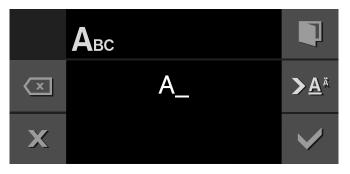

#### Enter the core temperature for a phase:

Choose the next phase with the > symbol. Set the heating function and temperature. Touch the  $\checkmark$  symbol. With the rotary selector, enter the required temperature and confirm it with  $\checkmark$ .

**Note:** For phases for which a core temerature has been programmed you cannot set a cook time.

### Entering a name

1 Enter the recipe's name under "ABC".

| Rotary                            | Selecting letters                                       |

2 Save with V.

- or -

Cancel with X and quit the menu..

**Note:** For entering a name, Latin characters, certain special characters and numbers are available.

### Starting a recipe

- Set the program selection to any heating function. The ₩ symbol is displayed.
- 2 Touch the W symbol. Set the required recipe with the rotary selector.
- 3 Start with ▶.

Operation begins. Its duration elapses visibly. The settings of the phases appear in the display bar.

|   |     | <b>2</b><br>20.00 |      |            |    |
|---|-----|-------------------|------|------------|----|
|   | 11/ | 5                 | 1.5  | 59 min sec |    |
| i |     | * 3               | 340° | F          | II |

### Notes

- The cooking time does not start counting down until the appliance has reached the set temperature.
- You can use the rotary selector to change the temperature while the recipe is in progress. This does not change the saved recipe.

### Deleting a recipe

- Set the function selector to any type of heating. The ₩ symbol is displayed.
- 2 Touch the  $\blacksquare$  symbol.
- **3** Use the rotary selector to select the desired recipe.
- 4 Delete the recipe with **C**.
- 5 Confirm with  $\checkmark$ .

### Meat thermometer

The core temperature probe enables exact cooking to the spot. It measures the temperature inside the food being cooked. Automatic switching off when the desired core temperature is reached ensures that each cooked food is cooked precisely.

Use the included core temperature probe only. You can purchase one as a spare part from after-sales service or in the online shop.

The core temperature probe is damaged at temperatures above 480°F (250°C). Therefore, only ever use it in your appliance at a maximum temperature setting of 445°F (230°C).

Always remove the core temperature probe from the oven interior after use. Never store it in the oven interior.

After every use, clean the core temperature probe with a moist cloth. Do not wash it in a dishwasher!

### **WARNING**

#### **Risk of electric shock**

Use of a wrong core temperature probe can damage the insulation. Use only the core temperature probe intended for this appliance.

#### WARNING

#### **Risk of burns**

The oven interior and the core temperature probe become very hot. Use oven mitts to plug and unplug the core temperature probe.

## Insert the core temperature probe in the food to be cooked

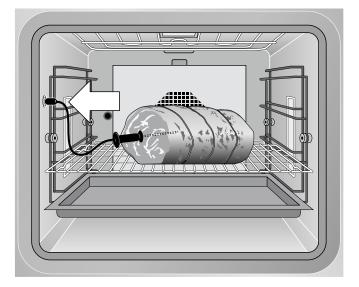

Insert the core temperature probe in the food to be cooked before you place it in the oven interior.

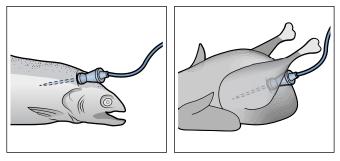

Insert the metal tip at the thickest point in the food you are cooking. Make sure that the end of the tip is approximately in the center. It must not be placed in the fat and must not touch any cookware or bones.

If there are several pieces, insert the core temperature probe in the middle of the thickest piece.

Insert the core temperature probe completely, if possible.

In the case of poultry, make sure that the tip of the core temperature probe is not in the cavity in the center, but in the meat between the belly and upper leg.

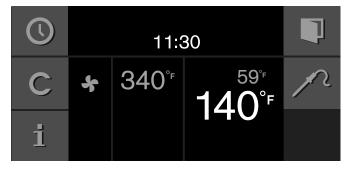

When using with bread, insert the core temperature probe into the coldest part of the bread only after baking for 10–15 minutes. The core temperature probe pierces the crust, but does not sink into the dough. Continue baking the bread until the desired core temperature is reached.

### Setting the core temperature

- Insert food into the oven interior with the core temperature probe inserted. Insert the core temperature probe in the socket in the oven interior and close the appliance door.
   Do not jam the core temperature probe's cable!
   and the current core temperature appear in the display.
- 2 Set the program selection to the required heating function.
- **3** Set the oven interior temperature with the rotary selector.

Touch the  $\bigwedge$  symbol. With the rotary selector, set 4 the required core temperature and confirm it with N.

The set core temperature must be higher than the current core temperature.

5 The appliance heats with the set heating function. The current core temperature is displayed and, under it, the set core temperature.

You can change the set core temperatur at any time.

A signal sounds when the set core temperature in the food has been reached. The cooking mode is ended automatically. Confirm with  $\checkmark$  and turn the program selection to 0.

#### Notes

- The measurable range is 59 to 210° F (15 to 99°C). \_ Outside the measurable range, "--°F" is displayed for the current core temperature.
- If you leave the food in the cooking compartment for \_ some time after cooking, the core temperature will continue to rise somewhat due to the residual heat in the cooking compartment.
- If at the same time you adjust a programming with the core temperature probe and the cooking time timer, then the programming switches the device off that reaches the specified value first.

#### Changing the core temperature set:

Touch the 🖍 symbol. Use the rotary selector to change the set core temperature for the food and confirm with N.

#### Deleting the core temperature set:

Touch the 🖍 symbol. Delete the set core temperature with **C**. The appliance continues heating in normal cooking mode.

### Core temperature guidelines

Use chilled food only, not frozen food. The details given in the table are guidelines. Results depend on the quality and composition of the food.

For hygiene reasons, critical foodstuffs such as fish and game should reach a core temperature of 143 - 158° F (62 - 70 °C); for poultry and minced meat this should be as high as 176 - 185° F (80 - 85 °C).

### Roasting function

Only with heating type "Roaster operation":

In the pre-roast stage, the oven heats at full power for approx. 3 minutes. This way, you can cook steaks quickly.

Touch the  $\nearrow$  symbol. The pre-roast stage starts up. You can also set the pre-roast feature several times one after another.

| U | 11:30           |                 |
|---|-----------------|-----------------|

| i |                 |                 |

### Childproof lock

The appliance has a panel lock to make sure children cannot operate it inadvertently.

#### Notes

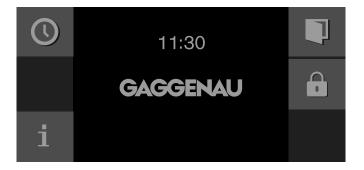

- You must set the child lock in the factory setting to "Available"
- If there is a power cut while the child lock is activated, it may be deactivated when the power returns.

### Activating the child lock

#### **Requirement:**

Program selector is set to 0.

Touch the ⊕ symbol for at least 6 seconds.

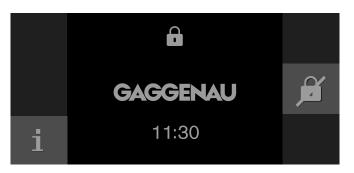

The child lock is activated. The standby screen appears. The 🗗 appears at the top of the display.

### Deactivating the child lock

#### **Requirement:**

Program selector is set to 0.

The child lock is deactivated. You can switch on the appliance in the usual manner.

### **Factory setting**

In the general settings, you can adapt your appliance individually.

- 1 Set the program selector to S.
- 2 Select "General setting" with the rotary selector.
- **3** Touch the  $\checkmark$  symbol.
- 4 Set the required general setting with the rotary selector.
- 5 Touch the  $\$  symbol.
- 6 Set the general setting with the rotary selector.
- 7 Save with ✓ or cancel with X and quit the current general setting.
- 8 Turn the program selector to **0** to quit the general setting menu.

Changes are saved.

|                       |                  |   |  |

### Cleaning and maintenance

If taken care of and cleaned conscientiously, your appliance will stay beautiful and intact for a long time. Here we explain how to take care of and clean your appliance correctly.

#### **WARNING**

#### **Risk of electrical shock**

Moisture entering the appliance can cause an electrical shock. Don't use a high-pressure cleaner or steam cleaner.

#### WARNING

#### Risk of burns

- To avoid risk of injury, never touch the inside surfaces of the oven interior or heating elements. These surfaces are extremely hot after use. Always allow the appliance to cool down before touching or cleaning the interior.
- Always turn off the interior light before cleaning the oven to allow the bulbs to cool down. The bulbs can become very hot when switched on. Keep the light off while cleaning the oven.
- Keep children away.

### A WARNING

#### Risk of injury

Scratched glass in the appliance door can burst. Do not use any glass scrapers or strong or abrasive cleaning agents.

### A WARNING

Do not clean the appliance while it is still hot. Some cleaners produce noxious fumes when applied to a hot surface. Wet clothes and sponges can cause burns from steam.

### **Cleaning agents**

Pay attention to the information in the table to ensure that the various surfaces are not damaged by incorrect cleaning agents. Do not use any

- sharp or abrasive cleaning agents
- metal or glass scrapers to clean the glass on the appliance door.
- metal or glass scrapers to clean the door seal.
- hard abrasive pads or cleaning sponges.

Thoroughly rinse out new sponge cloths before use.

| Area  | Cleaning agent   |  |  |  |
|---|--|--|--|--|
|   | Glass cleaner: Clean with a soft cloth or a  |  |  |  |
| Door panels   | microfiber cloth.  |  |  |  |
|   | Do not use a glass scraper.  |  |  |  |
| Diaplay   |  |  |  |  |

#### **Microfiber cloth**

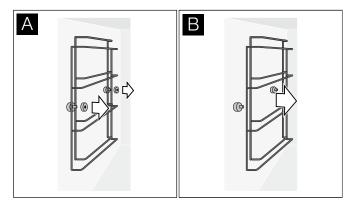

The honeycomb microfiber cloth is particularly suitable for cleaning sensitive surfaces such as glass, glass ceramic, stainless steel or aluminum (product no. 00460770, also available from our online online shop). It removes liquid and greasy deposits in one go.

### Removing slide-in racks

You can remove the slide-in racks for cleaning.

#### Removing slide-in racks

- 1 Place a dish cloth in the oven interior to protect the enamel against scratches.
- 2 Undo the knurled nuts (Figure A).
- **3** Detach the slide-in racks (Fig. B).

You can clean the slide-in racks in a dishwasher.

#### Hooking in slide-in racks

- 1 Fit slide-in racks the right way round: with the longer side pointing up. The left and right-hand racks are identical.
- 2 Tighten the knurled nuts.

### Pyrolysis (self-cleaning)

### WARNING

During the elimination of soil during self-cleaning, small amounts of Carbon Monoxide can be created and the fiberglass insulation could give off very small amounts of formaldehyde during the first several cleaning cycles. To minimize exposure to these substances, provide good ventilation with an open window, or use a ventilation fan or hood.

Wipe out excessive spillage before self-cleaning the oven.

### A WARNING

#### Risk of fire

The appliance becomes very hot during pyrolytic self-cleaning. Never hang flammable items such as dishcloths on the door handle. Keep the front of the appliance clear. Keep children away.

### WARNING

#### Severe health risk

The appliance becomes very hot during pyrolytic self-cleaning. The non-stick coatings on trays and forms are destroyed and toxic gases are produced. Never leave trays and forms with nonstick coatings in the oven during pyrolytic selfcleaning. Only leave enameled accessories in oven during self-clean cycle.

Do not clean parts or accessories in the self-clean oven.

# Preparing the pyrolytic self-cleaning feature

#### 

Risk of fire! Loose food remnants, fat and meat juices may catch fire. Wipe the cooking compartment with a damp cloth.

- Remove the worst soiling and food residues from the oven.
- Clean the door seals, the inside of the door and the glass pane by hand as these parts are not cleaned during the pyrolytic self-cleaning cycle.

- Remove any loose parts from inside the cooking compartment. The plug-in grids are pyrolysis-proof. Make sure that nothing is left inside the cooking compartment.
- Bush for the additional heating element at the back of the cooking compartment: Make sure that the cover is in the bush.
- Close the oven door.

### Starting self-clean (pyrolysis)

- 1 Set the program selector to S.
- 2 The  $\swarrow^+$  symbol is displayed. Confirm with  $\checkmark$ .
- 3 The turn-off time for when the self-clean (pyrolysis) will be completed is displayed. If preferred, the turn-off time can be changed with the rotary selector. Confirm with ✓.
- 4 Remove all accessories and coarse soiling from the oven interior. Confirm with ✓.
- 5 Start with ▶. The cleaning time counts down on the screen. If the turn-off time was changed, the time until the self-clean (pyrolysis) starts counts down on the screen. The oven light remains off.

After 3 hours, a signal sounds. A message will appear on the screen. Once the appliance is cool, wipe out the remaining ash from the oven with a damp cloth.

**Note:** The oven door is locked for your safety. After cooling down, the door is unlocked as soon as the temperature has dropped below 390 °F (200 °C).

Depending on the type of soiling, white deposits may remain on the enamel surfaces. These deposits are residue from the food and are harmless. They do not affect how the appliance works. If required, you can remove these residues using lemon juice and a soft cloth.

### Cleaning the Accessories with the Pyrolytic Self-cleaning Feature

Gaggenau baking trays and broiler pans are coated with pyrolysis-resistant enamel. For optimal results when cleaning the oven, we recommend removing all accessories from the oven before initiating the pyrolytic self-cleaning feature. This is the only way to achieve even heat distribution.

If you wish to remove burnt-on residue from your baking tray or broiler pan with the pyrolytic self-cleaning cycle, please observe the following instructions:

#### Notes

- Remove the worst soiling, meat juices, and food residues before initiating the pyrolytic self-cleaning cycle. Food residues, grease, and meat juices may catch fire during the pyrolytic self-cleaning cycle.
- Slide only one baking tray or broiler pan onto the lowest rack in the oven.
- Push the baking tray or broiler pan in as far as it will go.
- Wire rack, rotisserie spit, cast iron roaster, baking stone, core temperature sensor, or other accessories must not be cleaned in the pyrolytic self-cleaning cycle.
- Broiler pans with stainless steel bushings can discolor during the pyrolytic self-cleaning cycle. This does not affect its usability.

### Troubleshooting

You can often easily eliminate problems that may occur on your own. Before calling customer service, take into account the following information.

#### **WARNING**

#### **Risk of electric shock** Improper repairs are dangerous. Only an authorized servicer may perform repairs and may replace damaged plug and connections. Remove the power plug or turn off the circuit breaker or fuse in the fuse box if the appliance is damaged or not working. Call Customer Service.

| Disruption  | Possible cause  | Solution   |
|---|---|--|
| Appliance not working, no display                               | Plug not inserted   | Connect the appliance to the electricity mains   |
|   | Power failure   | Check whether other kitchen appliances are working   |
|   | Fuse defective  | Check in the fuse box whether the fuse for the appliance is in working order   |
|   | Operating error   | Switch off the fuse for the appliance in the fuse box and switch it on again after about 10 seconds  |
| Appliance cannot be started                                     | Appliance door is not quite closed  | Close appliance door   |
| Appliance is not working, display is not responding.            | Child lock activated  | Deactivate child lock (see section entitled<br>'Child lock')   |
| Appliance switches off automatically                            | Safety deactivation: the appliance has<br>not been operated for longer than 12<br>hours | Confirm the message with $\checkmark$ , switch off the appliance and set it again.   |
| Appliance does not heat up, $\checkmark$ appears in the display | Appliance is in the demo mode   | Deactivate demo mode in the basic settings   |
| Error message "Exxx"  |   | If an error message appears, turn the program<br>selection to <b>0</b> ; if the display goes off, it was a<br>one-time problem. If the problem occurs<br>repeatedly or if the display stops, please con-<br>tact after-sales service and inform them of the<br>error code. |

### Power cut

Your appliance can bridge a power cut of a few seconds. Operation continues.

If the power cut was for a longer period and the appliance was in operation, a message appears in the display. Operation is interrupted.

Set the function selector to **0**, then the appliance can be operated again as usual.

### Demo mode

The demo mode is activated if the  $\not\prec$  symbol appears in the display. The appliance does not heat up.

Briefly disconnect the appliance from the mains (switch off the domestic fuse or the circuit-breaker in the fuse box). Then deactivate the demo mode within 3 minutes in the factory setting.

### Replacing the oven lamp

You can replace the oven lamps. You can obtain replacement lamps after-sales service or from trade dealers. Use the same type of halogen bulbs only.

- Top lamp:
   60 W/230 V/G9
- Side lamp: 10 W/12 V/G4

### **WARNING**

#### Risk of electric shock

When you replace the oven interior lamp, the contacts of the lamp holder are live. Before replacing the lamp, remove the power plug or deactivate the circuit breaker or fuse in the fuse box.

### A WARNING

#### **Risk of burns**

Lamps become very hot when switched on. There is still a risk of burning your skin for some time after they have been switched off. Allow lamps to cool down before replacing them.

**Note:** Always use a dry cloth to remove the halogen lamp from its packaging. This lengthens the lamp's useful life.

#### Replacing the top oven lamp

- 1 Undo the screw on the lamp cover. The lamp cover folds down.
- 2 Take out the halogen lamp. Insert the new halogen lamp.
- **3** Fold up and screw down the lamp cover.
- 4 Switch on the fuse in the fuse box again.

#### Replacing the side oven lamp

- 1 Place a dishcloth in the oven to avid damage.
- 2 Undo the knurled screws on the slide-in rack. Remove the slide-in rack.
- **3** Press the top retaining spring to the side. Remove the glass cover.
- 4 Take out the halogen lamp. Insert the new halogen lamp.
- 5 Insert the glass cover at the bottom into the retaining spring and latch it at the top. The beveled side of the glass cover must point toward the oven.
- 6 Remove the dishcloth from the oven.
- 7 Switch on the fuse in the fuse box again.

#### Replacing the glass cover

The glass cover in the oven must be replaced if it is damaged. You can obtain covers from after-sales service. Always specify the E number and the FD number of your appliance.

### **Customer service**

If your appliance needs repairs, our customer service is there for you. We work hard to help solve problems quickly and without unnecessary service calls, getting your appliance back up and running correctly in the least amount of time possible.

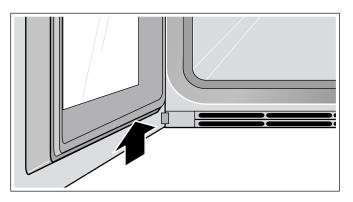

When you call, please indicate the product number (E-Nr.) and serial number (FD-Nr.) so that we can support you in a qualified manner. You will find the type plate with these numbers on the bottom of the appliance. To avoid having to search for a long time when you need it, you can enter your appliance data and the customer support telephone number here.

FD-Nr.

E-Nr.

#### Customer Service 🗇

Please read the use and care instructions provided with your appliance. Failure to do so may result in an error in using the appliance. This could result in a service call that instead of fixing a mechanical issue is only needed for customer education. Such calls are not covered by the appliance warranty.

Please find the contact data of all countries in the enclosed customer service list.

#### To book an engineer visit and product advice

| USA    | 877 442 4436<br>toll-free |
|--------|---------------------------|
| CANADA | 877 442 4436<br>toll-free |

You can rely on the manufacturer's expertise. Rest assured that the repair will be handled by trained service technicians who have the original replacement parts for your appliance.

### Tables and tips

#### Notes

- Always preheat the appliance. This will provide the best cooking results. The cooking times specified refer to a pre-heated appliance.
- The values specified are intended as a guide. The actual cooking time depends on the quality and temperature of the food before cooking, the weight and thickness of the food to be cooked.
- The tables list temperature and/or time ranges. Try the lowest value to start with. You can always choose a longer time next time if need be.
   A lower temperature will result in more even browning. If necessary, set a higher temperature.
- The specifications refer to average quantities for four people. If you would like to prepare more, you should calculate a longer cooking time.
- Use the cookware specified. If you use other cookware, cooking times may be longer or shorter.
- You may use any heat-resistant cookware. Place the cookware in the center of the wire rack. For large roasts, you can also use the grill or glass tray.
- Do not crowd the wire rack and baking trays too tightly. This guarantees optimal heat circulation.
- For the preparation of bulky foods, you can also remove the side slide-in tray. Place the wire rack directly on the bottom of the cooking compartment

### Vegetables

- Vegetables from the oven are a good alternative to vegetables from the pan. The flavors are concentrated and the roasting aromas make them very aromatic. Furthermore, very little fat is required for preparation.
- Wash the vegetables and mix them in a bowl with a little oil. Place in a heat-resistant pan or distribute evenly in the glass/grill tray.
- During cooking, stir at least once. After cooking, adjust the spices and flavor to taste with fresh herbs.
- Vegetables are suitable as warm or cold appetizers or vegetarian main dishes, or also as side dishes to be served with fish and meat.
- For small portions (for 2-3 people), use an ovenproof dish and place it on the wire rack. Otherwise the food will burn or dry out in the glass/ wire tray.
- Always follow the manufacturer's instructions for pre-cooked and frozen products.

and place the food or the roasting dishes on the wire rack. Do not place the food or the roasting dishes directly on the enameled bottom.

- Make sure to open the cooking compartment door of the pre-heated appliance only briefly and to fill the cooking compartment quickly.
- The details for the level refer to the slide-in level from below for appliances with 4 slide-in levels. The values in brackets refer to appliances with 5 slide-in levels.
- When removing it, place glass cookware on a dry trivet, never on a cold or wet surface. The glass can explode.
- Some operating modes are not available with all oven models or only with special accessories.
- Economy heating function:
  - Energy-saving hot air operation for cakes, meat, bakes and gratins. Optimal use is made of the residual heat. Convenience functions remain switched off (e.g. the interior lighting). The cooking compartment temperature can only be displayed while the appliance is heating up. Do not preheat the oven.
    - Make sure that the cooking compartment is cold and that there is nothing already in there when you place the food inside. Then start the specified cooking time. To avoid losing heat, always keep the appliance door closed when cooking.

| Dish  | Accessories                           | Level | Temperature<br>in °F (°C) | Type of<br>heating | Cooking time<br>in min. | Observations  |
|---|---------------------------------------|-------|---------------------------|--------------------|-------------------------|---|

### Side dishes and dishes

- The best side dishes from the oven are based on potatoes, for example potatoes au gratin. However, other outstanding side dishes can also be prepared in the oven, which normally are prepared in the pan (e.g. potato pancakes or fried potatoes). The advantages of this tye of preparation: you can prepare larger quantities at once, the cooking smells are distributed less in the room, and you can prepare the dishes with less fat.
- Another versatile side dish from the oven is cheese. Cheese is an especially good addition to vegetarian dishes, or you can prepare the cheese as an appetizer or finger food.
- Dishes that are suited for preparation in the oven are especially dishes that are gratinated, such as casseroles and gratins. Suitable also are dishes with a dough base, e.g. pizza or tarte flambée, and egg dishes such as tortillas.
- For small portions (for 2-3 people), use an ovenproof dish and place it on the wire rack. Otherwise the food will burn or dry out in the glass/ wire tray.
- Always follow the manufacturer's instructions for pre-cooked and frozen products.

### Fish

- Fish should (for hygienic reasons) have a core temperature of at least 144 - 158°F (62 - 70 °C) after cooking. This is also the ideal cooking point.
- Only salt the fish after cooking. Thus the natural aroma is retained and less water is removed from the fish.
- Oil the wire rack and baking tray a little bit, then the fish will not stick.
- For fillets with skin: if you place the fish skin-side up, the structure and aroma will be retained better.
- Cut wooden skewers short or soak in water overnight before skewering the ingredients so they do not burn.
- Always follow the manufacturer's instructions for pre-cooked and frozen products.

### Meat

- For better results, use the core temperature sensor. For notes and optimal target temperatures, see the *Core temperature sensor* chapter.
- Let meat rest 10 15 min. after cooking. This way, the meat can "relax." The circulation of the meat juice slows down and there is less loss of juice when cutting into the meat. Large pieces of meat such as roasts can rest in the oven. Smaller ones, e.g. steaks, should rest outside the oven wrapped in aluminum foil.
- For small portions (2 3 people) use a heatresistant pan so that the food does not burn or dry out.

- Use the wire rack or the roasting dish for a large roast and for types of preparation that generate a lot of liquid for roasting.
- Marinate overnight and discard the marinade before roasting or grilling, e.g. with the back of a knife or a spoon. Otherwise the spices and herbs will burn.
- When the roast gets too dark and the crust is burned in places, reduce the temperature the next time and check the slide-in level.
- If the roast is cooked but the sauce is burned on, next time use a smaller roasting dish and add more liquid. If the sauce is too watery, next time use a larger roasting dish and add less liquid.

\* First cook thoroughly in a pan/roasting dish on the burner.

\*\* Brown the meat at high temperature, after 15 - 20 min. switch back to a lower temperature.

\*\*\* Cook meat at a low temperature, set the temperature higher for the last 15 - 20 min.

\* First cook thoroughly in a pan/roasting dish on the burner.

\*\* Brown the meat at high temperature, after 15 - 20 min. switch back to a lower temperature.

\*\*\* Cook meat at a low temperature, set the temperature higher for the last 15 - 20 min.

### Poultry

- For better results, use the core temperature sensor. Do not place it in the middle (hollow space), but rather between the belly and upper thigh. For notes and optimal target temperatures, see the *Core temperature sensor* chapter.
- Poultry will turn out particularly crispy and brown if you baste it towards the end of the roasting time with butter, salted water, drippings or orange juice.
- When cooking duck or goose, pierce the skin on the underside of the wings to allow the fat to run out.
- Use a roasting dish or another heat-resistant pan for dishes that generate a lot of liquid for roasting. The same applies if a lot of fat can run out of the food, e.g. with roast goose.

\* Cook meat at a low temperature, set the temperature higher for the last 15 - 20 min.

\*\* Turn food halfway through the cooking time.

### Grilling and roasting

- Do not grill food with the oven door open.
- Use the grill tray with inlaid shelf for grilling (depending on the version, accessory or special accessory). Pour approximately 100 ml water into the grill tray; this will catch the meat juices so that the oven stays clean. If you pour in too much water, this may alter the cooking result because too much steam will be produced.
- The pieces of food to be grilled should be of roughly the same thickness (at least 2 to 3 cm). This will allow them to brown evenly and remain succulent and juicy. Never add salt to meat before

grilling it. Place the pieces to be grilled directly on the wire rack.

- If you use wooden skewers, these can burn. In order to prevent this, cut the skewers as short as possible or soak them overnight in water before spearing the ingredients, or use metal skewers.
- For small quantities, use the energy-saving "Compact grill" heating function. With this heating function, only the center part of the grill is heated. Place the food to be grilled in the middle of the wire rack.

| Dried plums<br>wrapped in bacon     | Baking tray +<br>greaseproof<br>paper | 3 (4) | 390 (200)                 | www  | 8 - 10                  | Also tastes good with dates or apricots  |

\*\* Gratin depending on desired degree of browning.

# Baked goods

- We recommend dark pans of metal since these absorb the heat better. Place the pan in the middle of the wire rack.
- For sheet cakes without greaseproof paper, oil the pan slightly.
- Small baked items such as cream puffs, cookies or pastries can be baked on two levels, 1+3 or 2+4.
- If you bake on several levels it is normal that the trays are not done at the same time. Leave the lower trays bake a little longer or put them in the oven earlier the next time.
- Before cutting, let the baked goods cool on a rack.
- If the baked goods are too dark on the bottom: insert one level higher, select a lower temperature.

If the baked goods are too dark on the top: insert one level lower, select a lower temperature, and extend the baking time a bit.

- If the cake is too dry, set the temperature a little higher. If the cake is not cooked on the inside, set the temperature a little lower.
   Baking times cannot be shortened by selecting a higher temperature; it is better to select a somewhat lower temperature.
- If the cake collapses: use less liquid or set the temperature 50°F (10 °C) lower. Do not open the oven door too soon.
- The cake rises only in the middle: grease the edges of the pan.

- If the cookies are hard to take off the sheet, insert the sheet in the hot oven again and remove the cookies while they are still warm.
- If the cake does not come out of the pan when yhou turn it over, use a knife to loosen the cake around the edges. Turn the cake pan upside down again

and cover it several times with a cold, wet cloth. Next time, grease the pan well and sprinkle some bread crumbs into it.

• Always follow the manufacturer's instructions for pre-cooked and frozen products.

\*\* Deactivating the quick heat function in the basic settings
 (see chapter *Basic settings*: Basic settings > Pre-heat time/signal > Pre-heating with signal)

### Dough proving (leaving to rise)

- Place the bowl with the dough on the wire rack. Select the "dough proofing" heating function.
- For large quantities, e.g. bread, set the temperature to 100 - 105°F (38 - 40°C). This way, the dough rises evenly from the middle to the edges.
- For small quantities of dough, for noodles or rolls, you can set the temperature to 105 - 115°F (40 - 45 °C).
- The suggested cooking time is only a guideline. Let the dough proof until its volume has doubled.
- If the dough does not rise, you have used too little yeast or not kneaded the dough enough.

| Dish  | Accessories | Level | Temperature<br>in °F (°C) | Type of<br>heating | Cooking time in min. | Observations  |
|-------|-------------|-------|---------------------------|--------------------|----------------------|---|
| Dough | Bowl        | 2 (3) | 100 (38)                  | Ð                  | 25 - 45              | e.g. yeast dough, natural fementation starter, sourdough, dumplings |

### Desserts

- Oven-cooked desserts are very easy to prepare you just have to put it in the oven. This preparation method is well-suited for larger quantities, for example if you have guests.
- Oven-cooked desserts are generally eaten warm, and are particularly enjoyable during the cooler months.

| Dish                          | Accessories                           | Level | Temperature<br>in °F (°C) | Type of<br>heating    | Cooking time in min. | Observations   |
|-------------------------------|---------------------------------------|-------|---------------------------|-----------------------|----------------------|--|
| Apple Crumble                 | Ovenproof<br>dish                     | 2 (3) | 390 (200)                 | *                     | 35 - 40              | Apple casserole with streusel, also tastes very good when made with berries or mirabelles.                       |
|                               |                                       | 2 (3) | 390 (200)                 |                       | 25 - 30              | For soft types of apples.  |
|                               |                                       | 2 (3) | 390 (200)                 |                       | 25 - 30              | For firm types of apples.  |
| Baked apples                  | Ovenproof<br>dish                     | 2 (3) | 375 - 390<br>(190 - 200)  | *                     | 20 - 30              | Recommendation: use cooking apples,<br>e.g. Boskop. These are especially well-<br>suited for cooking and baking. |
|                               |                                       |       |                           |                       |                      | Summer variant: fill with ricotta, lemon, honey, cardamom, vanilla, and pine nuts.                               |
| Compote                       | Glass /                               | 2 (3) | 320 - 355                 | *                     | 30 - 40              | e.g. apricots or assorted berries  |
|                               | grill tray                            |       | (160 - 180)               |                       |                      | _ Do not add any liquid, stir several times.   |
|                               |                                       | 2 (3) | 390 (200)                 |                       | 30 - 40              | Season with honey, fresh vanilla or cinna-<br>mon.   |

# Defrosting

- For this, use the "defrost" heating function.
- The defrost values specified are intended as a guide. The defrost time depends on the size, weight, and shape of the food to be defrosted: freeze your foods flat or separately. This shortens the defrost time.
- Slide the wire rack with the frozen food into the second shelf level (in the third shelf level if there are five shelf levels). Slide the grill tray underneath to catch any excess liquid.
- Remove the food from the packaging before defrosting.
- Only defrost the quantity that you need right away.
- Please consider: defrosted food will not last as long as frozen food and will spoil more quickly than fresh food. Prepare defrosted food immediately and cook it thoroughly.
- After half the defrost time has elapsed, turn the meat or fish. Separate defrosted food in pieces,

e.g. berries or pieces of meat. Fish does not have to defrost all the way; it is sufficient if the surface is soft enough to take up the spices.

• The oven is not suited for defrosting whole chickens and roasts; this takes a long time. It is much faster to defrost such foods in the steam oven.

|  | WARNING |
|--|---------|
|--|---------|

#### Health risk

When defrosting food from animal sources, you must remove the liquid that escapes during defrosting. It must never come into contact with other food. Bacteria could be transferred. Slide the glass/grill tray under the food. Pour away the excess liquid collected from the meat and poultry. Then clean the sink and rinse with plenty of water. Clean the glass/grill tray in hot soapy water or in the dishwasher. After defrosting, operate the oven for 15 minutes using Hot air at 355°F (180°C).

Dish Cooking time Accessories Level Temperature Observations Type of in °F (°C) heating in min. Berries (500 g) 120 - 130 Glass / 2 (3) \* 25 - 30 grill tray (50 - 55) 120 - 130 \* Vegetables (500 g) Glass / 2 (3) 30 - 50 The defrosting time depends on the porgrill tray (50 - 55) tioning. Small vegetables such as peas and beans defrost faster than blocks of spinach or whole cauliflower. Chicken legs Wire rack 2 (3) 120 - 130 \* 45 - 50\* (200 g each) (50 - 55)\* Fish fillet Wire rack 115 - 120 45 - 50\* 2 (3) (150 g each) (45 - 50)\* 115 - 120 Prawns Wire rack 2 (3) 20 - 25 (45 - 50)

 \* Add balancing time: switch appliance off after the defrost time has elapsed and leave the food in the closed appliance for 10 -15 minutes so that it defrosts all the way to the center.

## Preserving

- If possible, cook food immediately after purchase or harvesting. Longer storage decreases the vitamin content and can cause spoilage.
- Only use fruit and vegetables in good condition.
- The oven is not suited for preserving meat.
- Check and clean the canning jars, rubber rings, clamps, and springs carefully.
- Place the canning jars in a heat-resistant container with water. Make sure that they do not touch. The

water level must reach at least three quarters of the way up to the top of the contents of the jars.

- Open the cooking compartment door after the cooking time has elapsed. Do not remove the canning jars from the cooking compartment until they have cooled down completely.
- Store the preserves in a cool, dark and dry place, e.g. in a pantry. Once the jars have been opened, use the contents up quickly and store in the refrigerator.

| Dish       | Accessories | Level | Temperature<br>in °F (°C) | Type of<br>heating | Cooking time in min. | Observations           |
|------------|-------------|-------|---------------------------|--------------------|----------------------|------------------------|
| Fruit      | Wire rack   | 1 (2) | 300 - 320<br>(150 - 160)  |                    | 35 - 40              | in closed canning jars |
| Vegetables | Wire rack   | 1 (2) | 375 - 390<br>(190 - 200)  |                    | 60 - 120             | in closed canning jars |

# Disinfecting

- Before canning, the jars should be disinfected in the oven in order to prevent spoilage. Only this way is it possible to store canned goods for a longer time and outside the refrigerator.
- Disinfect empty jars at 212°F (100°C) hot air for at least 20 minutes. The lids and seals for the jars can be disinfected simultaneously in boiling water so that they do not dry out in the dry heat in the oven.

| Dish         | Accessories | Level | Temperature<br>in °F (°C) | Type of<br>heating | Cooking time in min. | Observations               |
|--------------|-------------|-------|---------------------------|--------------------|----------------------|----------------------------|
| Disinfecting | Wire rack   | 2 (3) | 212 (100)                 | *                  | 20 - 25              | Canning jars, baby bottles |

# Drying

- Drying is a preservation method with which, through the feeding in of dry heat, up to 50% of the liquid in food is removed. At the same time, the flavor becomes more intense.
- The thicker the food is, the longer the drying process takes. Drying is the fastest and most energy-saving method if you want to cut food into slices.
- Place the prepared food on a roasting dish or tray covered with greaseproof paper. During the drying process, turn the food every now and then.
- The duration depends on the thickness of the food and the natural moisture in the food since drying tomatoes takes longer than drying mushrooms.
- If you would like to dry on two levels simultaneously, use levels 1 and 3 (or 2 and 4).

| Dish               | Accessories                      | Level | Temperature<br>in °F (°C) | Type of<br>heating | Cooking time<br>in hours | Observations  |
|--------------------|----------------------------------|-------|---------------------------|--------------------|--------------------------|---|
| Sliced mushrooms   | Wire rack +<br>greaseproof paper | 2 (3) | 120 - 140<br>(50 - 60)    | *                  | 3 - 4                    |   |
| Apple rings        | Wire rack +<br>greaseproof paper | 2 (3) | 120 - 160<br>(50 - 70)    | *                  | 5 - 8                    |   |
| Quartered tomatoes | Wire rack +<br>greaseproof paper | 2 (3) | 140 - 160<br>(60 - 70)    | *                  | 7 - 8                    | Remove the core from the tomatoes; otherwise the drying time is longer. |
| Herbs              | Wire rack +<br>greaseproof paper | 2 (3) | 120 - 140<br>(50 - 60)    | *                  | 1½ - 2                   | e.g. chives, parsley, sage  |

### **Baking stone**

- You will need a baking stone and heating element these are optional accessories.
- Whether you are baking crispy pizza or fresh bread, with the baking stone, you will achieve results that are comparable to, or even exceed, those that you would get from a massive stone oven because you are able to precisely control the baking temperature.
- Depending on the size, you can also place several pizzas, rolls or other baked goods on the baking stone at the same time.
- You can bake several pizzas in succession. This may increase the baking time per pizza by approx. 1 - 3 minutes.
- When baking bread, we recommend that you use the core temperature sensor. Wait 10 - 15 minutes after baking has begun before inserting the core temperature sensor into the thickest part of the bread. The sensor measures the internal temperature of the baked goods and switches the oven off when the set core temperature has been reached.
- When dough is baked, it needs to be able to expand without the surface breaking apart. This can be achieved by pricking it several times with a fork or by making a cut with a knife.
- The temperatures and times given in the cooking table are guideline values. Always follow the manufacturer's instructions for pre-cooked and frozen products.

| Dish                        | Accessories  | Level | Temperature<br>in °F (°C) | Type of<br>heating | Cooking<br>time in min. | Observations  |

| Foccacia                    | Baking stone | 1     | 410 (210)                 | <del></del>        | 15                      | Top with various ingredients, e.g. with herbs, sea salt, olives, sardines, onions, ham, tomatoes or cheese.     |
| Multi-grain bread           | Baking stone | 1     | 345 (175)                 | ~~~                | 45                      |   |
| Sourdough bread             | Baking stone | 1     | 480/390*<br>(250/200*)    | ww                 | 50 - 60                 |   |
| Olive-tomato bread          | Baking stone | 1     | 345 (175)                 | ~~~                | 45                      |   |
| Pizza, fresh                | Baking stone | 1     | 525 (275)                 | ww                 | 5 - 8                   | Cooking time varies depending on the type<br>and thickness of the dough and the toppings                        |
| Pizza, frozen               | Baking stone | 1     | 445 (230)                 | <del></del>        | 8 - 10                  | Cooking time varies depending on the thick-<br>ness of the dough. Observe the manufac-<br>turer's instructions. |
| Tarte flambee,<br>fresh     | Baking stone | 1     | 570 (300)                 | ww.                | 3 - 4                   | Recipe tip: classic or with fresh goat cheese,<br>Parma ham, figs, and pring onions.                            |
| Tarte flambee,<br>frozen    | Baking stone | 1     | 480 (250)                 | <del></del>        | 4 - 5                   |   |

 Pre-heat the appliance to the specified temperature. When putting in the food to be cooked, switch back to the lower temperature.

# **Roasting dish**

- You need the special accessory roasting dish and heating element.
- In the roasting dish, you can also braise large pieces of meat easily and cook large quantities.
- You can prepare food well and keep food warm in the oven. Your kitchen will look clean and tidy, the cooktop will not be dirty, and there will be fewer cooking odors because the dish was cooked in the oven.
- The non-stick coating enables you to roast using very little fat.

Tip: Instead of adding the fat to the roasting dish, oil the meat. This ensures a direct heat transfer.

- Cooking liquids reduce down quickly. Make sure there is always sufficient cooking liquid. For a cooking time of 30 minutes, add approx. ½ I liquid.
- When roasting in a sauce, always ensure the sauce remains runny and add cooking liquid.
- Please also observe the instructions in the roasting dish instruction manual.

| Dish                        | Accessories      | Level | Temperature<br>in °F (°C)          | Type of<br>heating | Cooking<br>time in min. | Observations   |
|-----------------------------|------------------|-------|------------------------------------|--------------------|-------------------------|--|
| Chicken breast              | Roasting<br>dish | 1     | 390 (200)                          |                    | Searing<br>+ 15 - 20    | Before inserting the food, also heat the<br>roasting dish with the roasting function.<br>Then insert the core temperature sensor.  |
| Beef goulash                | Roasting<br>dish | 1     | 430/265 - 285*<br>(220/130 - 140*) |                    | Searing<br>+ 60 - 120   | Sear onions and meat; use the roasting set-<br>ting for this. Pour in liquid and turn heat<br>down, depending on the type of meat, cook<br>for 60 - 120 minutes.   |
| Ossobuco                    | Roasting<br>dish | 1     | 430/285*<br>(220/140*)             |                    | Searing<br>+ 60 - 90    | Sear meat and vegetables; use the roasting<br>setting for this. Pour in liquid and turn heat<br>down, cook covered for 60 - 90 minutes.<br>Turn once.  |
| Viennese boiled<br>beef     | Roasting<br>dish | 1     | 430/265*<br>(220/130*)             |                    | Searing<br>+ 210 - 240  | Sear halved onions, add vegetables briefly<br>and fill up with liquid. Bring to a boil, sea-<br>son, and add beef. The meat should be com-<br>pletely covered with liquid. Put roasting lid<br>on and continue cooking at 265°F (130°C). |
| Venison ragout              | Roasting<br>dish | 1     | 430/265 - 285*<br>(220/130 - 140*) |                    | Searing<br>+ 60 - 100   | Sear meat and other ingredients; use the<br>roasting setting for this. Pour in liquid and<br>turn heat down, depending on the type of<br>meat and size of the pieces of meat, cook<br>for 60 - 100 minutes.                              |
| Roulades                    | Roasting<br>dish | 1     | 430/250*<br>(220/120*)             |                    | Searing<br>+ 60 - 90    | Sear roulades portion by portion; use the roasting setting for this.   |
| Tortillas                   | Roasting<br>dish | 1     | 345 (175)                          |                    | Searing<br>+ 10 - 15    | Sear all ingredients but for the eggs in the<br>roasting dish, then pour the eggs over the<br>top and continue cooking until the tortilla is<br>firm.  |
| Farmers' omelette           | Roasting<br>dish | 1     | 345 (175)                          |                    | Searing<br>+ 10 - 15    | Sear all ingredients but for the eggs in the<br>roasting dish, then pour the eggs over the<br>top and continue cooking until the farmers'<br>omelette is firm.   |
| Stuffed peppers, vegetarian | Roasting<br>dish | 1     | 390 (200)                          |                    | 30                      | Recipe tip: fill with cooked rice, Ebly wheat<br>or lentils and onions, cheese, herbs and<br>spices.   |
| Chili con carne             | Roasting<br>dish | 1     | 430/265*<br>(220 / 130*)           |                    | Searing<br>+ 60 - 90    |  |

# Acrylamide in foodstuffs

Which foods are affected?

Acrylamide is mainly produced in grain and potato products that are heated to high temperatures, such as chips, fries, toast, rolls, bread, fine baked goods (cookies, gingerbread, Christmas spice cookies).

| Tips for keepin<br>food | g acrylamide to a minimum when preparing   |
|-------------------------|--|
| General                 | Keep cooking times as short as possible.<br>Cook food until it is golden brown, but not<br>too dark. Large, thick pieces of food con-<br>tain less acrylamide. |
| Baking                  | With hot air at max. 355° F (180 °C).  |
| Cookies                 | Egg or egg yolk reduces the production of acrylamide. Spread out a single layer evenly on the baking tray.   |
| Oven<br>French fries    | Cook at least 400 g at once on a baking tray so that the fries do not dry out.   |
