Safety

Please read the safety information to ensure that you use the appliance safely.

General information
You can find general information about this instruction manual here.

- Read this instruction manual carefully. Only this will ensure you use the appliance safely and efficiently.
- This manual is intended for the installer and the user of the appliance.
- Follow the safety instructions and warnings.
- Keep the instruction manual and the product information safe for future reference or for the next owner.
- Check the appliance after unpacking it. Do not connect the appliance if it has been damaged in transit.

Intended use

Read the information on intended use to ensure that you use the appliance correctly and safely.

Only use this appliance:
- According to this installation and instruction manual.
- For washing machine-washable fabrics and hand-washable wool in accordance with the care label.
- With tap water and commercially available detergents and care products suitable for washing machines.
- In private households and in enclosed spaces in a domestic environment.
- Up to an altitude of max. 4000 m above sea level.
**Restriction on user group**

Avoid risks to children and vulnerable persons. This appliance may be used by children aged 8 or over and by people who have reduced physical, sensory or mental abilities or inadequate experience and/or knowledge, provided that they are supervised or have been instructed on how to use the appliance safely and have understood the resulting dangers.

Children must not play with the appliance.

Cleaning and user maintenance must not be performed by children unless they are being supervised.

Keep children under the age of 3 years and pets away from the appliance.

**Safe installation**

Take note of the safety instructions when installing the appliance.

⚠️ **WARNING – Risk of electric shock!**

- Improper installation is dangerous.
  - Connect and operate the appliance only in accordance with the specifications on the rating plate.
  - Connect the appliance to a power supply with alternating current only via a properly installed socket with earthing.
  - The protective conductor system of the domestic electrical installation must be properly installed. The installation must have a sufficiently large cross section.
  - When using a residual current circuit breaker, only use a type with the ⚡ mark.
  - Never equip the appliance with an external switching device, e.g. a timer or remote control.
  - When the appliance is installed, the mains plug of the power cord must be freely accessible. If free access is not possible, an all-pole isolating switch must be installed in the permanent electrical installation according to the installation regulations.
  - When installing the appliance, check that the power cable is not trapped or damaged.
If the insulation of the power cord is damaged, this is dangerous.
  ▶ Never let the power cord come into contact with hot appliance parts or heat sources.
  ▶ Never let the power cord come into contact with sharp points or edges.
  ▶ Never kink, crush or modify the power cord.

⚠️ WARNING – Risk of fire!
It is dangerous to use an extended power cord and non-approved adapters.
  ▶ Do not use extension cables or multiple socket strips.
  ▶ If the power cord is too short, contact Customer Service.
  ▶ Only use adapters approved by the manufacturer.

⚠️ WARNING – Risk of injury!
  ▶ The high weight of the appliance may result in injury when lifted.
    ▶ Do not lift the appliance on your own.
  ▶ If this appliance is not correctly installed in a washer-dryer stack, the installed appliance may fall.
    ▶ Only stack the dryer on a washing machine using the connection kit from the dryer manufacturer. No other installation method is permitted.
    ▶ Do not install the appliance in a washer-dryer stack if the dryer manufacturer does not offer a suitable connection kit.
    ▶ Do not install appliances from different manufacturers and with varying depths and widths in a washer-dryer stack.
    ▶ Do not install a washer-dryer stack on a platform; the appliances may tip over.

⚠️ WARNING – Risk of suffocation!
Children may put packaging material over their heads or wrap themselves up in it and suffocate.
  ▶ Keep packaging material away from children.
  ▶ Do not let children play with packaging material.
**CAUTION – Risk of injury!**
- The appliance may vibrate or move when in use.
  - Place the appliance on a clean, even, solid surface.
  - Align the appliance using the appliance feet and a spirit level.
- If hoses and power cords have been laid incorrectly, this causes a tripping hazard.
  - Lay hoses and power cords in such a way that there is no risk of tripping.
- If the appliance is moved by holding onto protruding components, such as the appliance door, the parts may break off.
  - Do not move the appliance by holding onto protruding parts.

**CAUTION – Risk of cutting!**
Touching sharp edges on the appliance may lead to cuts.
- Do not touch the sharp edges on the appliance.
- Wear protective gloves when installing and transporting the appliance.

**Safe use**

Follow these safety instructions when using the appliance.

**WARNING – Risk of electric shock!**
- If the appliance or the power cord is damaged, this is dangerous.
  - Never operate a damaged appliance.
  - Never pull on the power cord to unplug the appliance. Always unplug the appliance at the mains.
  - If the appliance or the power cord is damaged, immediately unplug the power cord or switch off the fuse in the fuse box and turn off the water tap.
  - "Call Customer Service." → Page 71
- Repairs to the appliance should only be carried out by trained specialist staff.
- An ingress of moisture can cause an electric shock.
  - Only use the appliance in enclosed spaces.
Never expose the appliance to intense heat or humidity.
Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

**WARNING – Risk of harm to health!**
Children can lock themselves in the appliance, thereby putting their lives at risk.
- Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

**WARNING – Risk of suffocation!**
Children may breathe in or swallow small parts, causing them to suffocate.
- Keep small parts away from children.
- Do not let children play with small parts.

**WARNING – Risk of poisoning!**
Detergents and care products may result in poisoning if consumed.
- If accidentally swallowed, seek medical advice.
- Keep detergents and care products out of the reach of children.

**WARNING – Risk of explosion!**
Laundry that has been pretreated with cleaning agents that contain solvents may cause an explosion in the appliance.
- Rinse pretreated laundry thoroughly with water before washing.

**CAUTION – Risk of injury!**
- The covering plate may break if you stand on or climb onto the appliance.
- Do not stand on or climb onto the appliance.
The appliance may tip over if you sit on or lean against the open door.
▶ Do not sit on or lean against the appliance door.
▶ Do not place any objects on the appliance door.

Reaching into the drum while it is still turning may cause hand injuries.
▶ Wait for the drum to come to a complete stop before reaching inside.

⚠️ CAUTION – Risk of burns!
When washing at high temperatures, the glass in the appliance door becomes hot.
▶ Do not touch the appliance door when it is hot.
▶ Keep children away from the appliance door when it is hot.

⚠️ CAUTION – Risk of scalding!
When you wash at high temperatures, the detergent solution gets hot.
▶ Do not touch the hot detergent solution.

⚠️ CAUTION – Risk of chemical burns!
If the detergent drawer is opened, detergent and care products may spray out from the appliance. Contact with eyes or skin may cause irritation.
▶ Rinse eyes and/or skin thoroughly with clean water if they come into contact with detergents or care products.
▶ If accidentally swallowed, seek medical advice.
▶ Keep detergents and care products out of the reach of children.

Safe cleaning and maintenance
Take note of the safety instructions when cleaning and performing maintenance work on the appliance.

⚠️ WARNING – Risk of electric shock!
▶ Improper repairs are dangerous.
▶ Repairs to the appliance should only be carried out by trained specialist staff.
Safety

▶ Only use genuine spare parts when repairing the appliance.
▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

■ An ingress of moisture can cause an electric shock.
▶ Do not use steam- or high-pressure cleaners, hoses or sprays to clean the appliance.

⚠️ **WARNING – Risk of injury!**
The use of non-original spare parts and non-original accessories is dangerous.
▶ Only use the manufacturer's original spare parts and original accessories.

⚠️ **WARNING – Risk of poisoning!**
Poisonous fumes may be given off if you use cleaning agents that contain solvents.
▶ Do not use cleaning agents that contain solvents.
Preventing material damage

Follow these instructions to avoid material damage and damage to the appliance.

**ATTENTION!**

- The functionality of the appliance may be impaired if you use the wrong quantity of fabric softener, detergent, care product or cleaning agent.
  - Follow the dosage recommendations from the manufacturer.
- Exceeding the maximum load capacity impairs the function of the appliance.
  - Observe the "maximum load capacity" → Page 29 for each programme and do not exceed it.
- The appliance is secured for transportation using transit bolts. Transit bolts which have not been removed may result in material damage and damage to the appliance.
  - Before starting up the appliance, remove the transit bolts completely and keep them in a safe place.
  - Before transport, fit the transit bolts fully in order to prevent damage in transit.
- Material damage may be caused if the water inlet hose is connected incorrectly.
  - Tighten the screw connections on the water inlet until they are hand-tight.
  - Ideally, connect the water inlet hose directly to the water tap, without any additional connecting elements such as adapters, extensions, valves or similar.
  - Make sure that the valve housing for the water inlet hose does not come into contact with its surroundings and is not subjected to any external forces.
- Ensure that the inner diameter of the water tap is at least 17 mm.
  - Make sure that the length of the thread on the connection to the water tap is at least 10 mm.
- If the water pressure is too high or too low, the appliance may not be able to operate properly.
  - Make sure that the water pressure in the water supply system is min. 100 kPa (1 bar) and max. 1000 kPa (10 bar).
  - If the water pressure exceeds the maximum value specified, a pressure-reducing valve must be installed between the drinking water connection and the hose set of the appliance.
  - Do not connect the appliance to the mixer tap of an unpressurised hot-water boiler.
- Modified or damaged water hoses may result in material damage and damage to the appliance.
  - Never kink, crush, modify or cut through water hoses.
  - Only use the water hoses supplied with the appliance or genuine spare hoses.
  - Never re-use water hoses that have been used before.
- Operating the appliance using water that is dirty or too hot may cause material damage.
  - Only operate the appliance with cold mains water.
- Unsuitable cleaning products may damage the surfaces of the appliance.
  - Do not use harsh or abrasive detergents.
Do not use cleaning products with a high alcohol content.
Do not use hard scouring pads or cleaning sponges.
Clean the appliance with nothing but water and a soft, damp cloth.
Remove all detergent residue, spray residue or other residues immediately if they come into contact with the appliance.

Environmental protection and saving energy

Help protect the environment by using your appliance in a way that conserves resources and by disposing of reusable materials properly.

Disposing of packaging
The packaging materials are environmentally compatible and can be recycled.
Sort the individual components by type and dispose of them separately.
Information about current disposal methods are available from your specialist dealer or local authority.

Save energy and conserve resources
If you follow these instructions, your appliance will use less electricity and less water.

Choose programmes with low temperatures and longer wash times and use "maximum load capacity" → Page 29.
Energy consumption and water consumption is most efficient.

Use the economy programme settings.
If you adjust the programme settings for a programme, the display shows the expected consumption.
"Add " → Page 41 detergent based on the laundry's degree of soiling.
For light to normal soiling, a smaller amount of detergent is sufficient. Observe the dosage recommendation from the detergent manufacturer.

Reduce the washing temperature for lightly and normally soiled laundry.
At low temperatures, the appliance consumes less energy. For light to normal soiling, lower temperatures than indicated on the care label are also sufficient.

Set the maximum spin speed if you want to dry the laundry in a tumble dryer afterwards.
The drier the laundry, the shorter the programme duration when drying which, in turn, reduces energy consumption. A higher spin speed reduces the residual moisture in the laundry and increases the volume of the spin noise.

Wash the laundry without prewash.
Washing with prewash increases the programme duration and increases energy and water consumption.

The appliance has a continuous automatic load adjustment function.
Depending on the type of fabric and load capacity, the continuous automatic load adjustment function optimally adjusts the water consumption and programme duration.
The appliance comes with an Aqua-Sensor.  
+ During the rinse cycle, the Aqua-Sensor checks the degree of turbidity of the rinsing water, and adjusts the duration and number of rinse cycles accordingly.

**Energy saving mode**

If you do not use the appliance for an extended period, it automatically switches to energy-saving mode. All displays go out and \[\text{Flash}\] flashes. Energy-saving mode ends when you use the appliance again, e.g. if you open or close the door. If you do not use the appliance for an extended period, the appliance switches off automatically.

---

### Installation and connection

You can find out where and how best to install your appliance here. You will also learn how to connect the appliance to the water and power supply.

### Unpacking the appliance

**Note:** Please read the information in the "Safety" → *Page 4* and "Preventing material damage" → *Page 11* sections to ensure that you use the appliance safely.

---

**ATTENTION!**

Objects remaining in the drum that are not designed for operation with the appliance may cause material damage and damage to the appliance.

+ Remove these objects, along with all supplied accessories, from the drum before starting the appliance.

1. Remove any packaging and protective covers completely from the appliance. For the environmentally friendly disposal of the packaging materials, observe the information on the topic of → "Disposing of packaging", *Page 12*.
2. Check the appliance for visible damage.
3. Open the door.  
   → "Basic operation", *Page 41*
4. Remove the accessory from the drum.
5. Close the door.
Contents of package

After unpacking all parts, check for any damage in transit and completeness of the delivery.

Requirements for the installation location

The appliance may "wander" when it spins. Observe the instructions for the installation location.

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.
**WARNING**

**Risk of electric shock!**
The appliance contains live parts. Touching live parts is dangerous.
- Do not operate the appliance without a cover cap.

**ATTENTION!**
- If the appliance is installed in areas exposed to frost or outdoors, frozen residual water may damage the appliance and frozen hoses may crack or split.
  - Do not install or operate this appliance anywhere that is liable to experience frost and/or outdoors.
- The appliance underwent a function test before leaving the factory and may, therefore, contain residual water. This residual water may leak out if the appliance is tilted at an angle greater than 40°.
  - Tilt the appliance carefully.

<table>
<thead>
<tr>
<th>Installation location</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>On a base</td>
<td>Secure the appliance with fixing brackets.</td>
</tr>
<tr>
<td>On a wooden joist floor</td>
<td>Place the appliance on a water-resistant wooden board which is screwed tightly to the floor. The wooden board should be at least 30 mm thick.</td>
</tr>
</tbody>
</table>

**Removing the transit bolts**
The appliance is secured for transportation using transit bolts on the rear of the appliance.

**Notes**
- Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.
- Keep the transit bolts, screws and sleeves in a safe place for future "transport" → Page 69.

1. Pull the hoses out of the holders.
2. Unscrew ① and remove ② all four screws for the transit bolts with a WAF 13 wrench.

3. Pull the power cord out of the holder.

4. Remove the four sleeves.

5. Put on the four cover caps.

6. Press down on the four cover caps.

Removing the transport struts

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Unscrew and remove the screws in the vertical transport struts using a T20 screwdriver.
2. Remove the transport struts.

3. Undo and remove the screws in the horizontal transport strut using a T20 screwdriver.

4. Remove the transport strut.

---

**Connecting the appliance**

Connect your appliance to the power supply, water inlet and water outlet.

**Connecting the water inlet hose**

*Note:* Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

⚠️ **WARNING**

**Risk of electric shock!**
The appliance contains live parts. Touching live parts is dangerous. ▶ Do not immerse the electrical AquaStop valve in water.

1. Connect the water inlet hose to a tap (26.4 mm = 3/4").

2. Open the water tap carefully and check that the connection points are tight.

**Water outlet connection types**

This information is intended to help you to connect this appliance to the water outlet.

*Note:* Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.
ATTENTION!
When draining, the water outlet hose is subject to water pressure and may come loose from the installed connection point.

- Secure the water outlet hose against unintentional loosening.

Drainage into a siphon.
Secure the connection point with a (24–40 mm) hose clamp.

Drainage into a washbasin.
Fix and secure the water outlet hose with an elbow.

Drainage into a plastic pipe with rubber sleeve or into a gully.
Fix and secure the water outlet hose with an elbow.

Connecting the appliance to the electricity supply

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Insert the mains plug of the appliance's power cable in a socket nearby.
   The connection details of the appliance can be found under "Technical data" → Page 73.
2. Check the mains plug is inserted properly.

Aligning the appliance

In order to reduce noise and vibration and to prevent the appliance from moving, align the appliance correctly.

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Loosen the lock nuts using a WAF 17 wrench by turning it in a clockwise direction.
2. To align the appliance, turn the appliance feet. Check that the appliance is level using a spirit level.
3. Screw the lock nuts tightly against the housing using a WAF 17 wrench.
In doing so, hold the foot tight and do not adjust its height.
Familiarising yourself with your appliance

Familiarise yourself with the parts of your appliance.

Appliance

You can find an overview of the parts of your appliance here.

On certain models, specific details such as the colour and shape may differ from those pictured.

Operating logic

In addition to the actual functions of the buttons on the display, you can also use these buttons to select programme settings in the main menu and settings in the sub-menus. The buttons are then marked by symbols in the display.

Main menu

To select programme settings, press the buttons above or below the symbols.

The selected programme setting is shown in the middle of the display.

Sub-menu

To select the settings you require, press the buttons below the symbols until the required setting is selected in the display.

If a setting is activated, the display shows ✓. The selection does not need to be confirmed again. The sub-menu closes automatically after a few seconds.
Display

The display shows the current settings, options or relevant information.

Before using for the first time

Prepare the appliance for use.

Starting an empty washing cycle

Your appliance was inspected thoroughly before leaving the factory. To remove any residual water, run the first wash cycle without any laundry.

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Press ı.

   ![Image of power button](image1)

   It may take a few seconds for the appliance to switch on.

2. Set the **Drum clean** programme.

3. Close the door.

4. Pull out the detergent drawer.

   ![Image of detergent drawer](image2)

5. Pour approx. 1 litre of water into the manual dosing compartment.

   ![Image of water dosing](image3)

6. Add washing powder to the manual dosing compartment.
Laundry

You can wash all items that the manufacturer has marked as machine-washable on the care label and fabrics made from hand-washable wool using your appliance.

Preparing the laundry

ATTENTION!
Objects remaining in the laundry may damage the laundry and the drum.
- Remove all items from any pockets in your laundry before using the appliance.
- To protect your appliance and the laundry, prepare the laundry beforehand.
  - Empty all pockets
  - Brush sand out of all collars and pockets
  - Close bed covers and cushion covers
  - Close all zips, Velcro fasteners, hooks and eyes
  - Tie cloth belts and apron strings together or use a mesh laundry bag
  - Remove curtain hooks and lead strips or use a mesh laundry bag
  - Use a mesh laundry bag for small items of laundry such as children's socks
  - Separate items of laundry and shake them out
  - Wash large and small items of laundry together
  - Dab fresh stains with soapy water (do not rub them)
  - Some stubborn or dried-in stains can be removed by washing several times

To prevent foaming, use only half of the amount of detergent recommended by the detergent manufacturer for light soiling. Do not use detergent suitable for woollens or delicates.

7. Push in the detergent drawer.

8. Press ▶ (Start/Reload) to start the programme.
   ✓ The display shows the remaining programme duration.

9. Start the first wash cycle or press ⊖ to switch off the appliance.
   → "Basic operation", Page 41
Sorting laundry

Note: Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

- To improve washing results and prevent discolouration, sort the laundry according to the following criteria before washing.

    - Type of fabric and fibre type
    - Whites
    - Colours
      - Wash new coloured items separately the first time you wash them.
    - "Soiling" → Page 39
    - "Care symbols on the care labels" → Page 39

Degrees of soiling

<table>
<thead>
<tr>
<th>Degree of soiling</th>
<th>Soiling</th>

<td>Wool</td>
</tr>
<tr>
<td></td>
<td>Not suitable for machine-washing</td>
<td>–</td>
</tr>
</tbody>
</table>

Tip: You can find more information about care symbols at www.ginetex.ch.
Detergents and care products

You can protect your appliance and your laundry by selecting and using the correct detergents and care products. You can use all detergents and care products which are suitable for domestic washing machines.

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

The manufacturer's instructions for use and dosage can be found on the packaging.

**Detergent recommendation**

This information helps you to choose the right detergent for your fabrics.

<table>
<thead>
<tr>
<th>Detergent</th>
<th>Fabrics</th>
<th>Programme</th>
<th>Temperature</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard detergent with optical brighteners</td>
<td>Heat-resistant white fabrics made from cotton or linen</td>
<td>Cottons</td>
<td>From cold up to 90 °C</td>
</tr>
<tr>
<td>Detergent for colours without bleach or optical brighteners</td>
<td>Coloured fabrics made from linen or cotton</td>
<td>Cottons</td>
<td>From cold up to 60 °C</td>
</tr>
<tr>
<td>Detergent for colours/delicates without optical brighteners</td>
<td>Coloured fabrics made from easy-care fibres or synthetic materials</td>
<td>Easy Care</td>
<td>From cold up to 60 °C</td>
</tr>
<tr>
<td>Detergent for delicates</td>
<td>Delicate fabrics made from silk or viscose</td>
<td>Delicates/Silk</td>
<td>From cold up to 40 °C</td>
</tr>
<tr>
<td>Detergent for woollens</td>
<td>Wool</td>
<td>Wool</td>
<td>From cold up to 40 °C</td>
</tr>
</tbody>
</table>

**Notes**
- Only use liquid detergents that are self-flowing
- Do not mix different liquid detergents
- Do not mix detergent and fabric softener
- Do not use products which have developed a top layer or are highly congealed
- Do not use products containing solvents, caustic agents or volatile substances (e.g. bleach)
- Use dyes sparingly as salt may damage stainless steel
- Do not use bleaching agents in the appliance

**Tip:** Visit www.cleanright.eu to find further information on detergents, care products and cleaning agents for domestic use.
Detergent dosage

Use the correct detergent dosage to achieve optimal washing results and save resources. The detergent dosage depends on:
- The amount of laundry
- Degree of soiling
- Water hardness

Water hardness

<table>
<thead>
<tr>
<th>Hardness range</th>
<th>Total hardness in mmol/l</th>
<th>German degrees in °dH</th>
</tr>
</thead>
<tbody>
<tr>
<td>soft (I)</td>
<td>0–1.5</td>

</tbody>
</table>

The dosages can be found on the manufacturer's packaging.
- If you are not using manual dosage, adjust the dosage to the actual load.
- If intelligent dosing is activated, do not adjust the dosage to the actual load capacity. The quantity of detergent and fabric softener is automatically calculated via the "basic dosage" → Page 46 and the amount of laundry detected. The basic dosage setting must always comply with the dosage for a load of 4.5 kg.

Water hardness

You can find out how hard your water is from your local water company or measure it yourself using a water hardness tester.

Basic operation

You can find out everything you need to know about operating your appliance here.

Switching on the appliance

- Press 1.
It may take a few seconds for the appliance to switch on.

The appliance performs an audible function test in the detergent drawer.
→ "Noise", Page 65

**Note:** The drum is lit up after the door is opened and closed and once the programme has started. The light goes out automatically.

### Setting a programme

1. Set the programme selector to the required "programme" → Page 29.
2. If necessary, "adjust the programme settings" → Page 42.

### Setting additional programmes

1. Set the Additional Programmes programme.
2. Press ➔ to call up the sub-menu for additional programmes.
3. Select a programme.

4. Press **Main menu** to call up the main menu.
5. Adjust the programme settings if required.
6. Start the programme.

### Adjusting the programme settings

Depending on the programme and programme progress, you can adjust or activate/deactivate the settings.

**Note:** Overview of all programme settings:
→ "Buttons", Page 26

**Requirement:** A programme has been set.

- Adjust the programme settings.
  → "Operating logic", Page 22
  The programme settings are not saved permanently for the programme.

**Note:** The setting is saved if you activate or deactivate the intelligent dosing system.

### Adjusting additional programme settings

1. Press ⊕ to call up the sub-menu for the additional programme settings.
2. Select the programme settings.
   The programme settings are not saved permanently for the programme.
3. Press ⊕ to call up the main menu.

### Saving the programme settings

1. Set the **Memory** programme.
2. Press ➔ to call up the sub-menu for the memory programmes.
3. Select a programme.
4. Press Main menu to call up the main menu.
5. Adjust the programme settings if required.
✓ The programme is saved.

Loading laundry

Notes
- Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.
- To prevent creasing, take note of the maximum load for the relevant "programme" → Page 29.

Requirement: Prepare and sort the laundry.
→ "Laundry", Page 38
1. Open the door.
2. Ensure that the drum is empty.
3. Separate the laundry and place it in the drum.
4. Note: Ensure that there is no laundry trapped in the door.
Close the door.

Adding detergent and care product

For programmes in which intelligent dosing is not possible or desirable, you can add detergent to the manual dosing compartment.

Notes
- Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.
- The dosing recommendation is aimed at the maximum load for the programme.

Tip: In addition to intelligent dosing, you can also add additional care product for laundry, e.g. stain remover, starch or bleach, to the manual dosing compartment. Do not add any additional detergent to the manual dosing compartment to avoid overdosage and/or foaming.

Requirement: Find out the optimum dosage for "detergent and care product." → Page 40
1. Pull out the detergent drawer.
2. Pour in detergent.
   → "Detergent drawer", Page 21
3. If required, add the care product.

Starting the programme

Note: If you want to change the time until the programme ends, set the "Ready in" time first.
✓ Press \[\text{00}\].
The drum rotates and load detection takes place. This can take up to 2 minutes, after which water enters the drum.

The display shows either the programme duration or the "Ready in" time.

Adding laundry

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Press \[ \text{Start/Stop} \].
   - The appliance is paused and checks whether it is possible to add or remove laundry.
2. Add or remove laundry.
3. Close the door.
4. Press \[ \text{Start/Stop} \].

Cancelling the programme

Once the programme has started, you can cancel it at any time.

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Press \[ \text{Start/Stop} \].
2. Open the door.
   - The appliance door remains locked for safety reasons if the temperature and water levels are high.
     - If the temperature is high, start the Rinse/Freshen Up programme.
     - If the water level is high: Start the Spin or Drain programme.
3. Remove the laundry.

Resuming the programme when the programme status is Rinse Hold

1. Set the Spin or Drain programme.
2. Press \[ \text{Start/Stop} \].

Unloading the laundry

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Open the door.
2. Remove the laundry.

Switching off the appliance

1. Press \[ \text{Start/Stop} \].
2. Wipe the rubber gasket dry and remove any foreign objects.
3. Leave the door and detergent drawer open so that residual water can evaporate.

Childproof lock

Secure your appliance against being operated unintentionally using the controls.

Activating the childproof lock

- Press and hold the two 3 sec. buttons for approx. 3 seconds.
- The display shows ➔.
- The controls are locked.
- The childproof lock remains active even after the appliance has been switched off.

Deactivating the childproof lock

Requirement: To deactivate the childproof lock, the appliance must be switched on.

- Press and hold the two 3 sec. buttons for approx. 3 seconds.
  So that the programme currently running is not cancelled, the programme selector must be set to the initial programme.
- ➔ goes out in the display.

Intelligent dosing system

Your appliance has an intelligent dosing system for liquid detergent and fabric softener.
The optimum quantities of liquid detergent and fabric softener are dispensed automatically depending on the programme and settings. The intelligent dosing system has been activated at the factory for all the designated "programmes" → Page 29 and can be deactivated for each one individually. In all other programmes, you can manually add detergent. → "Adding detergent and care product", Page 43

Filling the dispenser

Note
In order to use intelligent dosing, fill the dispenser.

- Fill the dispenser only with suitable "detergent and care products" → Page 40.
- If you change the liquid detergent or fabric softener, empty and clean the dispenser beforehand. → "Cleaning the detergent drawer", Page 53
- If you want to use both dispensers for liquid detergent, adjust the "contents of the dispenser" → Page 46.

Requirement: .GPIO flashes.
1. Pull out the detergent drawer.
2. Open the dispenser lid.
3. Pour liquid detergent \( \Delta \) and fabric softener \( \odot \) into the relevant dispensers.
   → "Detergent drawer", Page 21

4. Close the dispenser lid.
   **Note:** To prevent the detergent from drying out or drying up, do not leave the dispenser lid open for a long period of time.

5. Push in the detergent drawer.
6. Adjust the "basic dosage"
   → Page 46.

**Dispenser contents**

When it leaves the factory, the dispenser is set \( \odot \) for fabric softener \( \odot \). Alternatively, you can also use this dispenser \( \odot \) for a second liquid detergent \( \Delta \).

**Notes**

- If you change the content of the dispenser, the basic dosage for this dispenser is reset.

- If you use both dispensers for liquid detergent, you must select a dispenser which is to be used during washing.

You can change dispenser contents in the basic settings.

→ "Changing the basic settings", Page 52

**Basic dosage**

You can adjust the preset basic dosages for liquid detergent and fabric softener.

The basic dosage depends on the manufacturer’s instructions for the detergent, the water hardness and the degree of soiling of the laundry.

Always set a basic dosage that corresponds to the dosage for a standard load of 4.5 kg.

→ "Detergent dosage", Page 41

You can individually adjust the basic dosages for each dispenser.

→ "Changing the basic settings", Page 52

**Home Connect**

This appliance is network-capable. Connecting your appliance to a mobile device lets you control its functions via the Home Connect app, adjust its basic settings and monitor its operating status.

The Home Connect services are not available in every country. The availability of the Home Connect function depends on the availability of Home Connect services in your country. You can find information about this at: www.home-connect.com.

→ "Connecting the appliance to a WLAN home network (Wi-Fi) with WPS function", Page 47
The Home Connect app guides you through the entire login process. Follow the instructions in the Home Connect app to configure the settings.

Tips
- Please consult the documents supplied by Home Connect.
- Please also follow the instructions in the Home Connect app.

Notes
- Please note the safety precautions in this instruction manual and make sure that they are also observed when operating the appliance via the Home Connect app. → "Safety", Page 4
- Operating the appliance on the appliance itself always takes priority. During this time it is not possible to operate the appliance using the Home Connect app.

Home Connect settings
Adapt Home Connect to your needs. You can find the Home Connect settings in the basic settings for your appliance. Which settings the display shows will depend on whether Home Connect has been set up and whether the appliance is connected to your home network.

Connecting the appliance to a WLAN home network (Wi-Fi) without WPS function
Using your router's WPS function is the simplest way to connect the appliance to your home network.

Requirement: If your router has a WPS function, you can connect the appliance to your WLAN home network (Wi-Fi) automatically.

1. Press and hold the button for approx. 3 seconds. ✔ You are now in the Home Connect menu.
2. Select Connect.
3. Confirm the message in the display.
4. Press the WPS button on the router within the next 2 minutes. Take note of the information in the documents for your router.
   ✔ flashes in the display.
   ✔ The appliance attempts to connect to your WLAN home network.
   ✔ If the display shows Connected and lights up permanently, the appliance is connected to the home network.

5. "Connect your appliance to the Home Connect app." → Page 48

Connecting the appliance to a WLAN home network (Wi-Fi) without WPS function
If your router does not have a WPS function, you can connect the appliance to your WLAN home network (Wi-Fi) manually. The appliance quickly sets up its own Wi-Fi network. You can connect a mobile device to the WLAN network and transfer the
network information for the WLAN home network (Wi-Fi) to your appliance.

**Requirement:** The Home Connect app is open and you have logged on.

1. Press and hold ☐ for at least 3 seconds.
   ✔ You are now in the Home Connect menu.
2. Select **Man. network log-in**.
3. Select **Connect**.
4. Confirm the message in the display.
   ✔️ flashes in the display.
   ✔️ The appliance now sets up its own Wi-Fi network with the name (SSID) HomeConnect.
5. Call up the Wi-Fi settings on the mobile device.
   Connect the mobile device to the Home Connect Wi-Fi network and enter the password (key) HomeConnect.
   ✔️ Your mobile device now connects to the appliance. The connection process may take up to 60 seconds.
6. Open the Home Connect app on your mobile device and carry out the steps in the app.
7. In the Home Connect app, enter the network name (SSID) and password (key) for your home network.
8. Carry out the steps in the Home Connect app to connect the appliance.
   ✔️ If the display shows **Connected** and 📡 lights up permanently, the appliance is connected to the home network.

**Connecting your appliance to the Home Connect app**

**Requirements**
- The appliance is connected to the WLAN home network (Wi-Fi).
- The Home Connect app is open and you have logged on.

1. Select **Connect app**.
2. Select **Connect to the app**.
3. Confirm the message in the display.
   ✔️ The appliance connects to the Home Connect app.
4. Once your appliance is displayed in the Home Connect app, carry out the last steps in the Home Connect app.

✓ If the display shows **Connected**, the appliance is connected to the Home Connect app.

### Connecting the appliance to the energy manager

If you connect the appliance to the smart energy system (energy manager), you will optimise your energy consumption. The appliance starts only when your home photovoltaic system can provide sufficient energy or the energy tariff is good.

**Requirements**
- The smart energy system (energy manager) must use the EEBus Initiative communications standard.
- You have read about how to connect your appliance to the smart energy system (energy manager) in the instruction manual for the smart energy system (energy manager).

1. Press and hold ‡ for approx. 3 seconds.
2. Select **energy mngmt.**.
3. Select **Connect**.
4. Confirm the message in the display.

✓ The appliance is connected to the smart energy system (energy manager)

✓ If the appliance has connected to the energy manager successfully, the display shows ‡.

5. Activate Flex Start if you want the smart energy system (energy manager) to start up your appliance.

→ "Activate Flex Start", Page 49

### Activate Flex Start

Activate Flex Start to allow your smart energy system (energy manager) to start your appliance once your home photovoltaic system is able to provide sufficient energy or the energy tariff is good.

**Requirement:** The smart energy system (energy manager) cannot start your appliance until it is connected to the appliance.

1. Set the programme you require.
2. Press ⊀ to set the required time.
3. Press ⏪.
4. Press ⊀.

✓ The display shows **Delayed start**.

If the display shows **Flex Start**, Flex Start is activated and the appliance waits to be started by the smart energy system (energy manager).

✓ If the display changes to **: Ready in approx.**, the smart energy system (energy manager) has established a time at which your appliance can start.

✓ If the smart energy system (energy manager) does not start the appliance within the set time, the appliance will start the programme itself before the set time period ends.

The programme ends when the time period ends.

**Note**

Flex Start is deactivated for safety reasons in the following circumstances:
- Press ⏪.
- Open the door.
- Switch off the appliance.
- Power failure.
Activating Wi-Fi on the appliance

**Note:** When Wi-Fi is activated, the energy consumption increases in comparison to the values specified in the consumption value table.

1. Press and hold ‡ for approx. 3 seconds.
2. Select Wi-Fi On/Off.
3. Select on.
   ✓ Wi-Fi is activated.

**Note:** If Wi-Fi is activated, the appliance will not switch itself off automatically.

Deactivating Wi-Fi on the appliance

1. Press and hold ‡ for at least 3 seconds.
2. Select Wi-Fi On/Off.
3. Select off.
   ✓ Wi-Fi is deactivated

**Note:** If Wi-Fi is switched off and your appliance was previously connected to your home network, this connection will be re-established automatically when Wi-Fi is switched back on.

Software update

**Requirement:** The display shows A new software version is available. Do you want to update the software now? This may take several minutes.

1. Press and hold ‡ for approx. 3 seconds.
2. Select Software update.
3. Select Install now.
   ✓ The software update starts.

**Note:** The software update may take several minutes. Do not switch off the appliance while the software update is in progress.

Resetting the appliance network settings

1. Press and hold ‡ for at least 3 seconds.
2. Select Network settings.
3. Select Reset.
   ✓ The network settings are reset.

**Tip:** If you wish to operate your appliance again via the Home Connect app, you will need to reconnect it to the Wi-Fi and to the Home Connect app.

Remote diagnostics

Customer Service can use Remote Diagnostics to access your appliance if you contact them, have your appliance connected to the Home Connect server and if Remote Diagnostics is available in the country in which you are using the appliance.

**Tip:** For further information and details about the availability of Remote Diagnostics in your country, please visit the service/support section of your local website: www.home-connect.com

Data protection

Please see the information on data protection.
The first time your appliance is registered on a home network connected to the Internet, your
appliance will transmit the following types of data to the Home Connect server (initial registration):
- Unique appliance identification (consisting of appliance codes as well as the MAC address of the Wi-Fi communication module installed).
- Security certificate of the Wi-Fi communication module (to ensure a secure data connection).
- The current software and hardware version of your appliance.
- Status of any previous reset to factory settings.

This initial registration prepares the Home Connect functions for use and is only required when you want to use the Home Connect functions for the first time.

Note: Please note that the Home Connect functions can only be utilised with the Home Connect app. Information on data protection can be retrieved in the Home Connect app.

Declaration of Conformity

Gaggenau Hausgeräte GmbH hereby declares that the appliance with Home Connect functionality meets the essential requirements and other relevant provisions of the Directive 2014/53/EU.
A detailed RED Declaration of Conformity can be found online at www.gaggenau.com among the additional documents on the product page for your appliance.

2.4 GHz band: 100 mW max.
5 GHz band: 100 mW max.

### Changing the basic settings

1. To call up the basic settings for the sub-menu, press and hold both buttons \( \text{3 sec} \) for approx. 3 seconds.
2. Select the required basic setting. → "Overview of the basic settings", Page 51
3. Adjust the basic setting.
4. Press \( \text{3 sec} \) to call up the main menu.
Cleaning and servicing

To keep your appliance working efficiently for a long time, it is important to clean and maintain it carefully.

Tips on appliance care

Follow the tips for appliance care to ensure your appliance works correctly in the long term.

<table>
<thead>
<tr>
<th>Wipe down the housing and the control panel with nothing but water and a damp cloth.</th>
<th>The appliance parts remain clean and hygienic.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remove all detergent residue, spray residue or other residues immediately.</td>
<td>Fresh deposits are easier to remove without leaving any residue.</td>
</tr>
<tr>
<td>Keep the appliance door and detergent drawer open after use.</td>
<td>This allows the residual water to dry, reducing odours in the appliance.</td>
</tr>
</tbody>
</table>

Cleaning the drum

If you often wash at a washing temperature of 40 °C and lower or the appliance has not been used for a long period, clean the drum.

⚠️ CAUTION

Risk of injury!

Permanently washing at low temperatures and a lack of ventilation for the appliance may damage the drum and cause injury.

- Regularly run a programme for cleaning the drum or wash at temperatures of at least 60 °C.
- Leave the appliance to dry after every operation with the door open, and leave the detergent drawer to dry.

- Run the Drum clean programme without laundry.
  Add washing powder.

Cleaning the detergent drawer

If you change detergent or the detergent drawer is dirty, clean the detergent drawer and the pump unit of the intelligent dosing system.

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Switch off the appliance.
2. Pull out the detergent drawer.
3. Press down on the insert and remove the detergent drawer.

4. Remove the pump unit.

5. Unclip the detergent drawer lid and remove it.
6. Empty the detergent drawer.

7. **ATTENTION!** The pump unit contains electrical components.
   - Do not clean the pump unit in the dishwasher and do not immerse it in water.
   - Protect the electrical connection on the rear against water, detergent and fabric softener residue. Clean the pump unit with a damp cloth.

8. Clean the detergent drawer and the lid with a soft, damp cloth or hand shower.

9. Dry the detergent drawer, lid and pump unit and reinsert them.

10. Clean the inside of the detergent drawer housing.

**Descaling**

If you add detergent correctly, you do not need to descale your appliance. If you still wish to use descaler, follow the manufacturer's instructions for use.

**ATTENTION!**
The use of unsuitable descaling agents, e.g. for coffee machines, may damage the appliance.

- For this appliance, only use descaling agents that are available from the manufacturer's website or our after-sales service.

**Cleaning the drain pump**

Clean the drain pump in the event of faults, e.g. blockages or rattling noises.

**Emptying the drain pump**

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

1. Turn off the water tap.
2. Switch off the device.
3. Disconnect the appliance's mains plug from the power supply.
4. Open the maintenance flap.

5. Remove the maintenance flap.

6. Slide a receptacle under the opening.

7. Take the drain hose out of the holder.
8. **CAUTION - Risk of scalding!**
When you wash at high temperatures, the detergent solution gets hot.
▶ Do not touch the hot detergent solution.
To allow the detergent solution to flow out into the container, remove the sealing cap.

10. Insert the drain hose into the holder.

---

### Cleaning the drain pump

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

**Requirement:** "The drain pump is empty." → Page 55

1. Since water may remain in the drain pump, remove the pump cap carefully.
   - The filter insert in the pump housing may become stuck due to coarse particles of dirt. Loosen the dirt and remove the filter insert.

2. Clean the interior, the thread on the pump cap and the pump housing.
Cleaning and servicing

The pump cap is comprised of two parts which can be taken apart for cleaning.

3. Make sure that the impeller in the drain pump can be rotated.

4. Insert the pump cap.
   - Ensure that the parts of the pump cap are correctly assembled.

5. Screw on the pump cap.
   - The handle on the pump cap must be in a vertical position.

6. Insert the maintenance flap and lock it into place.

7. Close the maintenance flap.

**Before the next wash**

To prevent unused detergent from flowing straight into the outlet in the next wash, run the **Drain** programme after you have emptied the drain pump.

1. Turn on the tap.
2. Insert the mains plug.
3. Switch on the appliance.
4. Pour 1 litre of water into the manual dosing compartment.
5. Start the **Drain** programme.

**Cleaning the water outlet hose at the siphon**

If the water outlet hose at the siphon is dirty or the detergent solution is not being pumped out, you must clean these.

1. Switch off the appliance.
2. Disconnect the appliance's mains plug from the power supply.
3. Loosen the hose clamp and carefully remove the water outlet hose.
Cleaning the water inlet filter
Clean the filter in the water inlet in the event of blockages or if the water pressure is too low.

Emptying the water inlet hose
In order to clean the filter, first empty the water inlet hose.

1. Turn off the tap.
2. Set the **Cottons** programme.
3. Start the programme and leave it to run for approx. 70 seconds.
4. Switch off the appliance.
5. Disconnect the appliance's mains plug from the power supply.

Cleaning the filter on the tap

**Note:** Please read the information in the "Safety" → Page 4 and "Preventing material damage" → Page 11 sections to ensure that you use the appliance safely.

**Requirement:** The water inlet hose is empty.

1. Remove the water inlet hose from the tap.
2. Clean the filter with a small brush.

Residual water may leak out.

4. Clean the water outlet hose and siphon connecting piece.

5. Reattach the water outlet hose and secure the connection point using the hose clamp.
3. Connect the water inlet hose and check for leaks.
Troubleshooting

You can rectify minor faults on your appliance yourself. Read the troubleshooting information before contacting after-sales service. This will avoid unnecessary costs.

**WARNING**
Risk of electric shock!
Improper repairs are dangerous.

▶ Repairs to the appliance should only be carried out by trained specialist staff.
▶ Only use genuine spare parts when repairing the appliance.
▶ If the power cord of this appliance is damaged, it must be replaced by the manufacturer, the manufacturer's Customer Service or a similarly qualified person in order to prevent any risk.

</tbody>
</table>
Emergency release

To remove the laundry in the event of a power failure, for example, you can manually release the door.

Releasing the door

Requirement: "The drain pump is empty." → Page 55

1. ATTENTION! Escaping water may cause material damage.
   ▶ Do not open the door if you can see water through the glass.
   Pull the emergency release downwards with a tool and release.

   ▶ The door lock is released.

2. Insert the maintenance flap and lock it into place.
3. Close the maintenance flap.

Transportation, storage and disposal

You can find out here how to prepare your appliance for transportation and storage. You will also find out how to dispose of old appliances.

Removing the appliance

1. Turn off the tap.
3. Switch off the appliance.

4. Unplug the appliance's mains plug.
5. Drain the remaining detergent solution.
   → "Cleaning the drain pump", Page 55
6. Detach the hoses.
7. Empty the dispensers.

Inserting the transit bolts

Secure the appliance for transportation using transit bolts in order to prevent damage.

1. Remove the four cover caps.
   ▶ If necessary, use a screwdriver to remove the cover caps.

   Keep the cover caps.

2. Insert the four sleeves.

   3. Insert all screws into the four transit bolts and tighten slightly.
4. Insert the power cord into the holder ① and tighten all four screws for the transit bolts with a WAF 13 wrench ②.

5. Insert the hose into holder.

3. Start the Drain programme.
- The unused detergent cannot flow straight into the outlet during the next wash.

**Disposing of old appliance**

Valuable raw materials can be re-used by recycling.

⚠️ **WARNING**

**Risk of harm to health!**

Children can lock themselves in the appliance, thereby putting their lives at risk.
- Do not install the appliance behind a door as this may obstruct the appliance door or prevent it from opening.
- With redundant appliances, unplug the power cord. Then cut through the cord and damage the lock on the appliance door beyond repair so that the appliance door will no longer close.

1. Unplug the appliance from the mains.
2. Cut through the power cord.
3. Dispose of the appliance in an environmentally friendly manner.

---

**Using the appliance again**

1. Remove the transit bolts.
2. Pour approx. 1 litre of water into the manual dosing compartment in the detergent drawer.
Customer Service

If you have any queries on use, are unable to rectify faults on the appliance yourself or if your appliance needs to be repaired, contact Customer Service.

You can solve many problems yourself by consulting the information on troubleshooting in these instructions or on our website. If this is not the case, contact our after-sales service. We will always find an appropriate solution and try to avoid unnecessary visits being made by a Customer Service technician.

With any warranty claims, we will make sure that your appliance is repaired by trained after-sales technicians using genuine spare parts, including after the manufacturer's warranty has expired.

For safety reasons repairs to the appliance should only be carried out by trained specialist staff. The warranty claim becomes void if repairs or interventions have been carried out by persons not authorised by us for that purpose or if our appliances have been fitted with spare, supplementary or accessory parts that were not genuine parts and then resulted in a defect.

Function-relevant genuine spare parts according to the corresponding Eco-design Order can be obtained from Customer Service for a period of at least 10 years from the date on which your appliance was placed on the market within the European Economic Area.

Note: Under the terms of the manufacturer's warranty the use of Customer Service is free of charge.

Detailed information on the warranty period and terms of warranty in your country is available from our after-sales service, your retailer or on our website.

If you contact Customer Service, you will require the product number (E-Nr.) and the production number (FD) of your appliance. The contact details for Customer Service can be found in the enclosed Customer Service directory or on our website.

Product number (E-Nr.) and production number (FD)

You can find the product number (E-Nr.) and the production number (FD) on the appliance's rating plate. Depending on the model, the rating plate is located:
- On the inside of the door.
- On the inside of the maintenance flap.
- On the rear of the appliance.

Make a note of your appliance's details and the Customer Service telephone number to find them again quickly.

AQUA-STOP guarantee

In addition to warranty claims against the seller under the purchase agreement and in addition to our manufacturer's warranty, we offer compensation under the following conditions.
- If our Aqua-Stop system is defective and causes water damage, we will make good the damage for private users. To ensure protection from water damage, the appliance must be connected to the power supply.
- The liability guarantee is valid for the service life of the appliance.
A claim can only be made under the guarantee if the appliance has been correctly installed and connected with Aqua-Stop according to our instructions; this also includes correctly fitting the Aqua-Stop extension (genuine accessory). Our guarantee does not cover defective supply lines or fittings up to the Aqua-Stop connection on the tap.

If your appliance is fitted with Aqua-Stop, you can in principle leave your appliance unattended during operation and the tap turned on afterwards. The tap only needs to be turned off if you are away from home for a long period, e.g. on holiday for several weeks.
Consumption values

The following information is provided in accordance with the EU Ecodesign Regulation. The values given for programs other than the Eco 40-60 are indicative only and were determined in accordance with the applicable standard EN60456. The automatic dosing function has been deactivated for this purpose.

Note on the comparison test: Deactivate the automatic dosing function unless this function is the object of the test.

1 Depending on the appliance specifications

This product contains light sources from energy efficiency class F. These light sources are available as a spare part and must only be replaced by trained specialist staff.

More information about your model can be found online at https://energylabel.bsh-group.com. This web address is linked to the official EU EPREL product database. At the time of printing its web address had not yet been published. Please then follow the instructions on searching for models. The model identifier is made up of the characters before the slash in the product number (E-Nr.) on the rating plate. Alternatively you can also find the model identifier in the first line of the EU energy label.

---

1 Only applies to countries in the European Economic Area
