

Cooktops and downdraft ventilation

The Vario cooktops 200 series

GAGGENAU

Cooktops that exceed aspirations

A product of European engineering and the highest quality materials, the modular cooktops range has been extensively redesigned. Iconic in form and essential in function, one of an array of aesthetic modifications includes the addition of the quintessential Gaggenau control knob in black, anodized aluminium finish. Synonymous with the brand's minimalist, pure design, the control panel has also been re-created utilising the same, timeless finish. Situated seamlessly within the control panel, the knobs are clearly defined by a beguiling, warm orange lighting system – intelligently indicating whether, for instance, the cooktop is attaining its desired temperature or cooling down once it has been turned off.

The reoccurrence of the new, rectangular shape in the series adds a visual consistency to the Vario modular system. By utilising the same black, anodized aluminium finish, the new cooktops perfectly complement each other, as well as the corresponding ovens and steam ovens 200 series in their minimalist, purist design.

Creating the bespoke worktop

The modular Vario 200 series remains the choice for the kitchen of limited scale, with a downdraft at 15 cm width and a 28 cm gas wok, gas cooktop, electric grill, Teppan Yaki and flex induction. For those with more space to spare, there are gas and flex induction options at 60 cm as well as the 90 cm five burner gas cooktop. A regional variation includes the 38 cm flex induction.

Each gas cooktop includes mechanical power level regulation: putting nine precise power levels at the private chef's disposal. Induction cooktops offer a flex option whereby distinct zones can be combined into a larger cooking area. The electric grill and Teppan Yaki offer unparalleled searing capabilities.

Gaggenau's European innovation, the downdraft ventilation is also re-designed. Now available in a width of 15 cm, this special appliance features a suite of improvements to ensure increased and quieter performance whilst keeping visual harmony, in line with the other appliances in the Vario cooktops 200 series portfolio.

Overall, the cooktops and downdraft ventilation benefit from increased performance and quieter operation. Having pioneered both the Vario modular concept and downdraft ventilation systems in Europe, we continue to refine them.
