

Cooling

The 400 series refrigeration

GAGGENAU

Refrigeration that makes a statement.

The 400 series refrigeration can be finished in the same material as the rest of your kitchen furniture or as a single sheet of stainless steel; with or without a handle. Wine cabinets are offered with glass doors framed in either the kitchen's furniture material or in stainless steel as a special accessory. Assisted opening effortlessly reveals an uncluttered stainless steel interior with dark anthracite aluminum elements and clear glass shelving illuminated by warm white, glare-free LEDs.

Personal preferences can be programmed into the intuitive TFT touch display. The placement of the shelving and solid anthracite aluminum door bins can also be personalized, being easily adjusted using the flexible, near-invisible, rail system. This allows side by side installations to mirror shelving arrangements and present aligned shelves and door bins to the viewer.

Refrigerators house one fresh cooling drawer whose temperature is adjustable down to 32° and another drawer where the humidity is controllable.

GAGGENAU

Wine climate cabinets

The perfect way to preserve, protect and, should you choose glass doors, present your collection. A choice of five glare-free lighting scenarios can be chosen using the TFT touch display which also controls up to three independent climate zones.

An interior of stainless steel with fully extendable, oak and anthracite aluminum bottle trays, keep the precious contents safe. Further safeguards are provided by the cabinets' low vibration, humidity regulation and activated charcoal air filter.
