Planning notes

Door hinge not reversible.

The door panel surface of the appliance extends 47 mm from the furniture cavity.

If the handle (optional accessory) is retrofitted, the outer edge of the door handle extends 94 mm from the furniture cavity.

Consider the overhang, incl. the door handle where applicable, when planning to open drawers next to the appliance.

When planning a corner solution, pay attention to the 90° door opening angle.

To achieve the 550 mm installation depth, the connection cable needs to follow the slanted edge on the lower right hand corner of the housing.

The mains socket needs to be planned outside of the built-in niche.

Connection

Energy efficiency class A at a range of energy efficiency classes from A+++ to D.

Total connected load 3.7 KW.

Plan a connection cable.
