Planning notes
Door hinge not reversible.
No other electrical appliances should be installed above the BS.
The door panel surface of the appliance extends 21 mm from the furniture cavity.
The outer edge of the door handle extends 72 mm from the furniture cavity.
Necessary lateral gap between appliance door and furniture panel of min. 5 mm.
Consider the overhang, incl. the door handle, when planning to open drawers next to the appliance.
When planning a corner solution, pay attention to the 110° door opening angle.
To achieve the 550 mm installation depth, the connection cable needs to follow the slanted edge on the corner of the housing.
The mains socket needs to be planned outside of the built-in niche.
