Window contact switch

AA400510

- Can be combined with motorless appliances.
- When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.
- The window contact switch is suitable for this purpose.
- The ventilation 400 series and Vario downdraft ventilation 200 series have a connecting contact for a window contact switch.
- The ventilation appliance only works when the window is open if a window contact switch is connected. The lighting works even if the window is closed.
- Can be combined with motorless appliances.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the power supply line of the ventilation appliance needs a suitable safety switch.

The window contact switch is suitable for this purpose.

The ventilation 400 series and Vario downdraft ventilation 200 series have a connecting contact for a window contact switch.

The ventilation appliance only works when the window is open if a window contact switch is connected. The lighting works even if the window is closed.

Work on the connecting contact for the window contact switch may only be carried out by a suitably qualified electrician in compliance with the applicable national regulations and standards.
