Planning notes

Door hinge not reversible.
 The door panel surface of the appliance extends 21 mm from the furniture cavity.
 The outer edge of the door handle extends 72 mm from the furniture cavity.
 Necessary lateral gap between appliance door and furniture panel of min. 5 mm.
 Consider the overhang, incl. the door handle, when planning to open drawers next to the appliance.
 When planning a corner solution, pay attention to the 110° door opening angle.
 For installation underneath cooktops: Distance between the underside of the cooktop and the top edge of the oven cavity: min. 15 mm. The planning notes for the cooktops (particularly regarding ventilation, gas/electric connection) must be taken into account.
 To achieve the 550 mm installation depth, the connection cable needs to follow the slanted edge on the corner of the housing.
 The mains socket needs to be planned outside of the built-in niche.
