The outer edge of the door handle extends 90 mm from the furniture cavity.

For installation underneath cooktops: Distance between the underside of the cooktop and the top edge of the oven cavity: min. 15 mm. The planning notes for the cooktops (particularly regarding ventilation, gas/electric connection) must be taken into account.

To achieve the 550 mm installation depth, the connection cable needs to follow the slanted edge on the corner of the housing.

The mains socket needs to be planned outside the built-in niche.

Connection

Energy efficiency class A.

Total connected load 5.9 kW.

208 / 220 - 240 V / 60 Hz.

Connection cable 1.2 m without plug.
